Holden Beach POA Charged Up About Underground Power Lines

Holden Beach property owners want to keep pressuring Brunswick Electric Membership Corp. (BEMC) now that the local utility seems to be making progress on a long-awaited underground wiring project.

The Holden Beach Property Owners Association (HBPOA) voted Saturday to ask BEMC for a progress report every time the organization holds a meeting, which is four times per year.

Approximately 50 people attended the Labor Day weekend meeting Saturday morning at town hall. The HBPOA represents 826 landowners, and all or most of them are members of the electric co-op.

Holden Beach officials and homeowners have been upset about the lack of progress BEMC has made since it started burying all power lines on the island in 1988.

However, town officials say Brunswick Electric has done a lot of work this summer and plans to continue working steadily until the pro-

"Brunswick Electric does it at their own pace, right or wrong," Mayor Wally Ausley told the group. "We have a good rapport with them now, good communication. I think they're doing the best they can for

Gus Ulrich, executive secretary of the HBPOA and interim town manager, said BEMC has made steady progress since Ausley and HBPOA President Bob Lineberger met with company officials in June

"They've had somebody here working constantly and will have somebody here constantly," Ulrich

to the island because of similar projects at other local beach towns.

They have a lot of projects going on in other communities," Ulrich said. "Once everybody saw how well it was going in Holden Beach they wanted it too.

Ulrich said BEMC crews are currently burying conduit in the Holden Beach Harbor subdivision and along Ocean Boulevard West. Work in Holden Beach Harbor should be completed by the end of the year.

Ulrich said Brunswick Electric has installed 9,500 feet of conduit this summer. "They have been working pretty steady. You just don't see too many results of it.

Holden Beach officials are eager for BEMC to install conduit along all of Ocean Boulevard so the town can continue building sidewalks.

After extending the concrete walkway from Rothschild Street east to Blockade Runner, officials aren't sure which section of Ocean Boulevard West they will do next.

"We've probably had more good comments about sidewalks than anything else we've ever done at Holden Beach," Mayor Ausley said.

Ausley said BEMC has not told the town when the project will be finished. "They will not give you a date, folks. They will not tell you when it's going to be done. I don't

think they know themselves."

Some HBPOA directors said Saturday they don't think getting an occasional report from Brunswick Electric is enough.

"All these letters are great but they don't amount to a hill of beans," Andy Watson said. "Don't believe the words, believe the deeds. We're not going to get the deeds without fussing.

Director Crawford Hart suggested the HBPOA complain to the N.C. Public Utilities Commission. He said any report from BEMC "is not going to be worth the paper it's writ-

In the only other business Saturday, a motion to prohibit dogs from the strand year-round was defeated by a show of hands. Several homeowners voiced concern about dog droppings on the beach.

Mayor Ausley reported Saturday that the town board is in the process of hiring a new town manager. "I suspect before the month is over we'll be able to announce the hiring of a manager," he said.

Asked about the town's role in repairing oceanfront dunes, Ausley said the board is trying to set up a meeting with federal officials to discuss how to spend the \$56,000 the town received following the damaging March 13 storm.

Commissioners disagree with the Federal Emergency Management Agency's recommendations on where the money should be spent to rebuild dunes.

"We have a list of lots that we feel need to be protected in the event of a storm," Ausley said. Holden Beach has an additional \$44,000 in this year's budget for dune repairs.

HBPOA directors voted Saturday to discontinue the maintenance contract for the organization's computer

The contract costs \$317 per year, and Ulrich said the computer is only worth about \$700. "I think that money would be better spent saving for a new computer," he said.

The board of directors decided not to sponsor a "Meet The Candidates" forum prior to the November municipal election.

Driver Hit Patch Of Water, Lost Control

WORKERS HARVEST tobacco off Stone Chimney Road, Supply, at the end of a hot, dry summer which damaged other crops, especially corn. Brunswick is among 89 counties in which farmers are eligible for emergency natural disaster loans to cover damages and losses caused by drought. Late-season rains salvaged much of the local tobacco crop, which had been in jeopardy earlier in the summer.

HEAVY CORN LOSSES PREDICTED

Disaster Loans Available For Crops

The local Farmers Home Administration office is accepting applications for emergency loans to cover crop osses following one of the hottest, driest summers on

Heaviest losses are expected in corn, which on area farms "either made a crop or made a disaster," according to Ted Rivenbark of the federal Farmers Home Administration (FmHA) office in Shallotte.

"Our emergency committee has met, and is expecting very high percentage of loss in the corn crop, Rivenbark said Tuesday. "A good bit of it was not worth harvesting. We don't believe tobacco is going to be as bad as we had once feared, and soybeans should have a Crop damage varies throughout the county's agricul-

tural areas, because rain showers were isolated, Riven-Local farmers have until April 11 to to apply for the

low-interest loans, following a U.S. Department of Agriculture drought declaration issued Aug. 10. The program will cover losses which occurred from June 1 "to the present and continuing."

The local Farmers Home Administration office is at 143 W. Holden Beach Road in the Promenade Office Park, Shallotte. Farmers with questions should call 754-

Local Smart Start Group Wants To Be Pilot Project A meeting was held Tuesday and Smart Start or to arrange transporta-

After getting off to a late start, a coalition of Brunswick County service agencies, community groups, businesses and individuals is moving rapidly to prepare a local application for Smart Start.

Smart Start is an incentive program created by Gov. Jim Hunt as a vehicle for serving preschool children and their families, in order to better prepare youngsters physically and educationally for school.

Applications are being accepted through Sept. 15 by the N.C. Department of Human Resources for 12 pilot projects, one from each congressional district in the state. The problem-solving approaches developed by these programs will be used as models statewide as Smart Start is gradually funded to include all 100 North Carolina counties.

That's incentive enough for Brunswick County to want to be a pilot project, rather than a follower. Organizers here say they would rather have a program tailored to what is unique about Brunswick

'We are working really hard on this," said Nancy Price, administrative assistant to Brunswick County Health Director Michael Rhodes, chairman of the application team. "We have to decide what our county

"The other counties we are competing against are totally different from Brunswick," she said. New Hanover, for instance, is coastal, but is also urban and more densely populated. "They have a lot more services available that we do here."

Approximately 20 to 30 people have attended each Smart Start meeting to date, with more participants welcome, especially parents of preschoolers.

August Weather Near Normal, **NWS Wilmington Office Reports** After the second warmest month on record in July, things got back to nearly normal for August, according

to the monthly climatological report of the National Weather Service Wilmington office. The average temperature for

August was 79.8 degrees, or .4 degrees above normal. Average daily temperature extremes were 88.9 and 70.6 degrees. The highest temperature recorded

during August was 96 on the 29th, which tied a record high for the date set in 1931. The August low was 64 on the 24th.

Precipitation was below normal for August. During the month, 5.66 inches of rain fell, which is 1.28 inches less than average. There were 11 days of measurable rainfall, four with half an inch or more.

The greatest 24-hour rainfall amount was 3.14 inches on the 13th to 14th. Thunder occurred on 6 days.
