Hearing Problems?

Take a look inside your ear canal.

The Video Otoscope is a miniaturized camera that displays an exceptionally clear picture of your ear canal on a full-color monitor and then prints out a color photograph.

So you can see for yourself if there is a wax problem.

If you wear a hearing aid, the Video Otoscope can help determine the cause of fitting and other problems, so come in and let us update your files using this new technology. And if you take advantage of this special offer, there is no charge for this service.

Actual photograph of ear drum can help determine if you have any of several common ear canal problems. Pictures are not for medical diagnosis.
