

# NEWS of the WEEK

## Back To Work

Washington, D. C.—The President predicted that 2,000,000 persons would be transferred from direct relief to work relief payrolls by December 1. Apparent substantiation: Controller General McCarl approved WPA projects totaling \$1,500,000,000; Secretary of Labor Perkins reported industrial employment in September at highest level since November 1930, with payrolls leading August by \$12,000,000 a week; National Youth Administration disclosed plans to give local governments funds for putting 94,000 young people to work.

## Teaching Driving

State College, Pa.—Last year's toll of auto accidents amounted to 36,000 Americans killed, 1,000,000 injured, promoted the National Safety Council to suggest safe-driving courses in schools. The local high-school, aided by Prof. Amos E. Neyhart, of the mechanical engineering department of nearby State College, has added such a course, costing students who take it \$10-\$12 for use of car, gasoline and oil. None of Professor Neyhart's earlier students ever have had an accident.

## The Aged Gather

Chicago, Ill.—Bitch hiking, or by train, busses, planes and steaming flippers, 4,000 gray-haired old men and women gathered to listen to Dr. Francis Everett Townsend expound his "200-a-month-for-the-aged" doctrine. The Doctor reported 30,000,000 name to his petitions, \$638,803 collected in membership fees and the sale of books, pamphlets and buttons. Of this \$15,000 went to the Doctor and Executive Secretary Robert E. Clements. Enemies claim that the two pocket \$2,000 a week profits from their propaganda paper, "The Townsend Weekly," that Townsend-plan petitions bear only 7,000,000 names. "Let me admonish you against insidious propaganda within your ranks," cautioned the father of the plan.

## The Nobel Prize

Breisgau, Germany—Dr. Hans Spemann, zoology professor at the University of Freiburg, has occasion to thank the altruism of Alfred B. Nobel, Swedish inventor of dynamite, who remorsefully left \$9,000,000 forty years ago to provide annual awards for outstanding research in medicine, physics, chemistry, literature and world peace. This year's \$42,000 grant in medical research goes to Dr. Spemann for microscopical tissue transplanting on embryonic salamanders that may solve the mystery of cancer. "What can I do with so much money?" bubbled the excited doctor.

## Bose's Ups and Downs

Zlin, Czechoslovakia—In the huge Bata Shoe Factory's new administration building, the manager's office is built in an elevator shaft of its own. He presses a button and lands at any floor where his advice is needed.

## Coal: \$256,000 A Ton

Vineland, N. J.—George Duggan's eyes bulged when he shook a State Emergency Relief check for \$250,000 out of an envelope in which he expected to find \$12, covering a ton of coal he had delivered to a home on relief. "I'll take it in dollar bills," he told the startled local bank teller as he nonchalantly shoved the check through the wicket. After the mix-up had been cleared up, Duggan got \$17-\$12 for his coal, \$5 for his expenses in returning the wrong check.

## Crop Rotation Increases Productivity Of Land

Crop rotation is nearly as effective as farm manure and complete commercial fertilizers in maintaining and increasing soil productivity, as based on experimental yields of wheat, corn and oats, taken collectively. When rotation and the use of commercial fertilizers are practiced together the one practice adds to the

## LEGAL NOTICES

### NOTICE OF SALE

Under and by virtue of an order of the Superior Court of Perquimans County, made in the Special Proceeding entitled *J. C. Blanchard vs. Mrs. Corrie E. Blanchard* at the undersigned commissioner will, on the 30th day of November, 1935, at 12 O'clock M., at the Court House in Hertford, N.C., offer for sale to the highest bidder for cash the property described as follows: "Lying on the East side of Frog Hall Road commencing at a cedar post on said road, thence running an easterly course across the field to a mark cherry tree at the end of a ditch. Thence along said ditch a straight course to William S. Blanchard's line in the center of the swamp, thence along said Blanchard's line down the center of the swamp to George Jennings' line, thence up a branch along said Jennings' line to said Frog Hall Road, thence along said road to first station, estimated at 40 acres, be it the same more or less and known as a part of the Stephen Skinner tract of land.

This 24th day of October, 1935.  
CHAS. E. JOHNSON,  
Commissioner.

## Household Insects Easy To Control

Sodium fluoride is recommended as an insecticide to rid a house of cockroaches.

Dust the fluoride on places where the roaches run, said Dr. B. B. Fulton, research entomologist at State College. When they lick the dust off their feet, it poisons them.

Since young roaches are likely to hatch from eggs already laid, he continued, the dusting should be repeated every few weeks until they disappear.

If the roaches continue to infest a house, it is evident that they come from some source where at least some of the roaches are not reached by the dust.

Clothes moths cannot live in a high temperature. If fabrics are spread outdoors on a warm, sunny day, Dr. Fulton continued, they will soon develop a temperature fatal to the moths and eggs.

Saturating clothes with dry cleaning fluid and then putting them out in the sunshine to dry is recommended in cool weather. After they have dried, they may be stored by tying them up in paper or muslin bags.

The simplest treatment for moth infested furniture is to take it out of the house on a warm, sunny day and drench the fabric with dry cleaning fluid. Allow the furniture to remain in the sun until dried.

Sodium fluoride, mixed with eight parts of wheat flour to one part of fluoride, is an effective control for silverfish, Dr. Fulton added. Place the bait in the attic, basement, closets, on shelves, behind books, the space under the bathtub, and any other place where the insects may be.

## Overcrowding Is Bad For Poultry

Overcrowding the laying birds in fall and winter robs them of their vitality and makes them susceptible to disease.

Roy S. Dearstyne, head of the State College poultry department, recommends that the birds be given adequate housing facilities, with plenty of ventilation, but no drafts.

The colds and roup from which many flocks suffer during the fall months may be traced to inadequate ventilation, he said.

As cold weather approaches, he continued, it is advisable to check the birds again for parasites, both internal and external. Infected birds should be treated at once.

Birds to be used for breeding purposes should be blood tested for pullorem disease. When requested, the State Department of Agriculture will send an expert to make these tests for poultrymen.

Winter grazing crops should be sown in October, Dearstyne said, to provide a source of green feed for the flock during the winter. A mixture of Italian rye grass and crimson clover makes a good winter crop for this State.

He also stressed the importance of keeping accurate records on the flock. Records are essential to the development of a profitable poultry business, he declared.

Records help poultrymen ascertain which birds are good producers and which are falling down on the job. They show the cost of operation, and whether the poultryman is making a profit. They help him find weak spots in his system of management.

benefits of the other.

A proper rotation is the basis of intensive farming and of profitable land utilization; it provides an effective means of meeting the problem of food production; it permits of farming with livestock; it provides rest for the land; in that leguminous and other renovating crops are alternated with those of an exhausting nature; it permits of clean cultivation and weed control and it creates other productive soil conditions.

When rotation and the use of commercial fertilizers are practiced together the one practice adds to the

## Colored Youth Given Five to Twelve Years

(Continued from Page One)  
was found not guilty by the jury. The case against Melvin Colson, charged with reckless driving, was continued until the next term of court.

Charlie Brown, colored, charged with larceny, was paroled with judgment suspended until the next term of court. Brown was the driver of the truck which was used to haul the meat stolen from the smokehouse of Joseph Winslow, Bagleys Swamp farmer, last winter, for which crime two other Negroes are now serving terms in the penitentiary. Brown had served three months in jail awaiting trial at the April term of court. He was out on bond and after coming to court on the first day, went away and did not show up on the day of trial. He was apprehended, however, and brought back to jail, where he has been confined for the past six months. Sheriff J. E. Winslow and the other officers gave Brown a good name and said he had been a model prisoner, recommending judicial clemency.

After hearing the State's testimony in the case of D. Wesley Morgan, charged with giving a worthless check, Judge Harris stated to counsel that he would direct a verdict of not guilty if the defendant would pay the remainder of a certain repair bill in connection with the giving of the check. This was agreed upon.

John Ivey, colored, charged with possessing intoxicating liquor and with transporting, was found guilty of possession by a jury and was sentenced to the roads for six months.

Ivey's case was appealed from Recorder's Court. The defendant had previously been found guilty of assault with a deadly weapon in connection with some trouble over a woman, and had been ordered to leave the State for two years. After leaving the State, Ivey came back to Perquimans, and the officers who went to investigate found on his person a bottle containing liquor.

The case against Cora Chance, charged with disorderly conduct and trespass, was remanded to be tried before G. W. Chappell, Justice of the Peace.

Curzey Alexander, colored, charged with non-support of two of his six children, was ordered by Judge Harris to pay three dollars each week toward the support of the children, who are in the custody of their mother.

Theodore Sikes, colored, was tried for selling liquor. Judge Harris directed the jury to return a verdict of guilty, and sentenced the defendant to six months on the roads, sentence to be suspended upon payment of the costs of court.

Report of Grand Jury  
The report of the Grand Jury, which was read to the Court follows: We, the Grand Jurors, for the above term beg leave to make the following report:

We have acted on all matters that have come to our knowledge and have reported same to the Court.

We have inspected the Court House and find it in good condition with the exception of a leak in the roof.

We have visited the office of the Clerk of Court and find the records well kept and the office in good condition.

We have visited the office of the Register of Deeds and find it in good shape, but recommend having some of the records re-indexed.

We have visited the County Auditor's Office and find it in good condition.

We have visited the Prison Farm and find it is kept in a good and sanitary condition.

We have visited the County Home

and find that it is kept in good condition, but find it in need of the following repairs:

Back porch steps badly in need of repairs; back of colored inmate home needs new roof; shingles rotten and is a fire trap; House back of inmate home in need of roof, shingles rotten; Smoke house also needs new roof; corners of porch floors are rotten and in need of repair; metal roof on both buildings are rusting and need painting. We find that there can be enough timber cut on the property to take care of the above repairs and recommend that this be done.

We have visited the County Jail and find the floors, walls and toilet in good sanitary condition. The bedding is dirty and ragged. We recommend that the best blankets be washed and others be replaced by new ones.

We find School Buses numbers 1, 3, 5, 6, 7, in good shape in every respect. We find No. 2 has one bad tire and that ten children have to stand. We find No. 4 has fair brakes and ten children have to stand, otherwise in good condition. We find No. 8 in good condition but seven children have to stand. We find No. 9 in good condition but eleven children have to stand. We find that No. 29 has bad lights and horn, ten children have to stand, otherwise in good condition. We find No. 30 in good condition but twelve children have to stand.

We find Colored School bus No. 1 has only fair brakes, otherwise in good condition. We find Colored School Bus No. 2 in bad condition.

It has been called to our attention that the School at New Hope with 105 children on roll has only two teachers. We recommend that this be taken up with the proper authorities.

The Clerk of the Superior Court reported to us as follows:

All minors, in the knowledge of the Clerk have guardians, and their accounts are in good condition.

Administrators accounts in good shape with the exception of accounts for Estate of H. T. Shannonhouse. W. T. Shannonhouse, Admr., has not filed account since 1925.

Geo. W. Chappell, J. P., docket in good shape and proper report made. Fred Evans, J. P., and Durwood Barber, J. P., no cases tried and only verbal report made.

We recommend that the County Commissioners forthwith furnish the office of the Clerk of the Superior Court with the bookcase and filing cabinet, as recommended by the April 1935 Grand Jury.

Respectfully submitted,  
D. J. PRITCHARD,  
Foreman.

## OLD INDIAN HEALTH TONIC

PROTECT YOURSELF—INSIST ON  
FOR LIVER, KIDNEYS, BLOOD

The Unfailing Remedy for Laziness and a Drowsy, Tired  
Sleepy Feeling

It takes the place of Calomel without any restriction of habit or diet while taking. It positively will not make you sick, gripe or nauseate you in the slightest way like calomel pills and most all the various kinds of liver medicine. There are very few people in this world today who feel so well that a few doses of this medicine would not make them feel a great deal better and give them a new lease on life.

It makes the eyes bright, clears up the complexion, quickens the senses and is a most wonderful tonic and appetizer.

Relieves a bad cold or cough in one day.  
Relieves la grippe in one day.  
Relieves fever in one day.  
Relieves weakness and tired feeling in one day.  
Relieves pain in the neck, side, shoulder, back or hips in one day.  
Relieves bad headache in two hours.  
Relieves sick stomach, belching, gas on stomach in three hours.  
Relieves the worst case of drunkenness in six hours.  
Relieves bladder and kidney trouble.  
Relieves rheumatism, giving quick relief from pain.  
Relieves female diseases and women's troubles.  
Five or six doses will fix you so your work will not tire you one particle, and you can do your work with ten times the ease.

It will work a quantity of bile from the system that is as black as any ink that you ever saw come out of any ink bottle. Does not gripe a particle or makes you sick in the slightest way.

Manufactured by  
THE WALKER MEDICINE CO.  
Atlanta, Ga., U. S. A.

35 THIS COUPON 35  
Worth Thirty-Five Cents

This Coupon, if presented at once with only 65 Cents in Cash, is good for a \$1.00 bottle of OLD INDIAN HEALTH TONIC.

After using a bottle strictly according to printed directions on it, if you do not think it is worth more than you paid for it, you can bring the empty bottle and we will refund the 65 cents. Eat or drink anything you wish while taking it.

THIS COUPON GOOD AT
