Blaze Started From Overheated Motor: Remodeling Expected to Take Two Weeks

An estimated fifteen thousand dol lar loss was sustained in the fire discovered at the Pender Store in Hertford at 5:20 o'clock Sunday afternoon. The blaze was believed caused, it was stated by a company official, by an over-heated motor used in operating the refrigeration system at the store.

Dense smoke, which caused much of the damage to the grocery stock of the store, rolled from the windows of the building for more than thirty minutes. Prompt action on the part of the Hertford Fire Department confined the actual fire to the rear of the building, however, it was reported the building was very badly damaged. The local fire truck was hooked

up at the water plug at the rear of the building and threw a heavy stream of water into the blaze. Later, a truck from Harvey Point was brought to Hertford to lend any assistance deemed necessary. The fire ing discovered and was finally noticed by employes of the State Theatre who called the fire department.

The building is owned by J. H. Towe, and reports state insurance covered the damage to the building. The store of merchandise carried by the store was fully insured.
