Advertising rates furnished by request.

FRIDAY, OCTOBER 4, 1946.

**BACK IN ACTION ON FAMILIAR DIAMOND**

Jimmy Brown, a member of the Pittsburgh Pirates, will no doubt attract many baseball fans to Hicks Field Friday night when the Edenton Colonials cross bats with a team made up of major league stars. Jimmy is no stranger in these parts, having been seen in action many times while playing in the old Albemarle League before his debut in big time baseball.

"This data indicates that these 17 samples were much better than guaranteed—better by an average of at least two dollars per ton," said Coltrane.

He asserted, however, that during the months of June and July the quality of feed sold in North Carolina was generally speaking "the poorest we have observed for several years." He attributed the poor quality of feed during the early summer to the fact that all feed ingredients except oats were scarce and that this resulted in too much fiber.

**Sunday Guests**  
 Mr. and Mrs. Walton Lane and children, Mr. and Mrs. Wilson Hollowell and family, Mr. and Mrs. Johnnie Hollowell and son, Mr. and Mrs. Clemon Bass and family of Edenton, Mr. and Mrs. Carlton Chappel and children were Sunday guests at the home of Mr. and Mrs. Nixon Hollowell.

**CIRCLE NO. 3 TO MEET**

From where I sit... by Joe Marsh

**Going Fishing? Here's How!**

To hear Willie W. and Basil Strube arguing about fishing, you'd think it was more important than the atom bomb.

Willie favors dry flies, Basil pool-pools anything but wet flies. Willie swears by a Royal Coachman; Basil won't hear of anything but a Silver Doctor. And by the time it comes to steel rods versus bamboo rods... #!X&!!

Each used his favorite kind of fly, his favorite rod and his favorite place to cast. So over a fric glass of beer, they allowed as how maybe they were both right... which is how so many arguments should end.

From where I sit, if we all respected one another's different opinions—whether about trout flies, or drinking beer, or voting, life would be a whole lot pleasanter.

Joe Marsh

**Not Rolling In Prosperity**

The farmers of the nation, as a whole, are enjoying larger incomes, retiring their debts and adding to their financial assets.

When World War II began, the financial resources of farmers were estimated at \$5,250,000,000 and their total debts approximated \$10,000,000,000. This has been reversed and, at the end of 1945, the liabilities of farmers were estimated at \$5,000,000,000, with cash resources of more than three times that amount.

The 1946 income of American farmers is estimated at \$26,000,000,000, compared with \$21,468,000,000 in 1945 and \$21,038,000,000 in 1944. These figures will probably lead some Americans to conclude that the average farmer is rolling in prosperity, but they should not overlook the fact that wages for farm hands have steadily increased and that production costs have gone up considerably.

The situation, according to the Alexander Hamilton Institute, which is not partial to farmers, is that, despite the record income, the purchasing power of American farmers, based on 1929 as 100, declined both in 1944 and 1945. This is due to the fact that the increase in agricultural prices was not sufficient to offset the rise in the prices of goods bought by the farmers. This trend is expected to be reflected in the figures for 1946, due to higher prices for manufactured goods caused by recent wage increases.

The increased wages that factory workers are now receiving are expected to strengthen the strong demand for all farm products and to prevent any material deflation in farm prices.

**How To Start Fires**

With the approach of cold weather, the nation will witness an increase in the number of fires, in homes, in business places and in the forests, and, consequently, the public is being offered plenty of free advice on the methods they should adopt in order to prevent fires.

This is interesting. By reversing a series of "don'ts," sent out by the Fire Protection Institute, we are able to balance the propaganda and to give our readers the latest expert suggestions on the best methods of starting incendiary blazes at this time of the year. Here they are:

- 1.—Smoke in bed.
- 2.—Leave the electric iron turned on while you gossip over the back fence with a neighbor.
- 3.—Hang your fire extinguisher in a dark corner, behind boxes, brooms and ironing board. Never inspect or refill it.
- 4.—Use a wastebasket for cigaret ashes—never use an ash tray.
- 5.—Hang filmy curtains on kitchen windows, with sufficient length to blow over any open flame on the range.
- 6.—Store cans of gasoline, oil and grease in the garage and be sure that there is no fire extinguisher near your automobile.
- 7.—Forget the Fire Department's telephone number and, if possible, misplace the telephone directory.
- 8.—Always use inflammable fluids to clean clothing, especially if working near an open flame. It is a helpful idea to smoke a cigaret while doing this work.
- 9.—Never put a fire screen in front of your open hearth fires, regardless of how high the fuel is piled.
- 10.—Do not bother to inspect electric wiring, or replace frayed wires on electrical appliances.
- 11.—Keep a large pile of oil-soaked rags and mops in a remote corner of the house. Spontaneous combustion will provide a good fire and it will be especially dangerous if it begins under the stairs.
- 12.—When cooking on a gas stove, leave pots boiling. Sometimes the liquid will overflow and extinguish the flame, thus permitting the gas to fill the room. The pilot light will eventually provide the fireworks.
- 13.—By following the above suggestions, you and your family will shortly be living in a tent. This is not so bad because outdoor life is healthy, but if you do not correct your habits, it won't be long before you will also burn down the tent.

**Movement Under Way To Formulate Basketball League**

**Plan Is to Line up 12 Teams In This Section Of State**

An effort is being made by a number of interested individuals in the Windsor area to form an independent semi-professional basketball league for the coming season. A 12-team league with regularly scheduled games and a post-season tournament are proposed once the league is organized.

Teams in Northeastern North Carolina who are interested in the formation of such a league are urged to address inquiries to "Basketball Loop," P. O. Box 217, Windsor, N. C. An organization meeting of all interested towns and independent teams will be held in the near future.

**Army Now Accepting Men Of All Branches**

The Army Recruiting Office in Elizabeth City has announced that former members of the Navy, Coast Guard and Marines may now enlist in the new regular Army with the same rating or as near as allowed by the War Department under the ruling of WD pamphlet 12-16. In order to be accepted for enlistment under these provisions the following steps must be used. Navy personnel and former members of the Coast Guard must bring along with their discharge Nav-pers. Form 553 (Navy and Coast Guard separation record). This is for verification of prior service. Former members of the Marine Corps must have their Nav MC Form 78-P, (Marine Corp Separation Record).

The Army urgently needs men who are qualified in the specialties listed under this order. For complete details see the Army Recruiting team in the Carolina Building, Elizabeth City, or the recruiting officers who are at the Edenton Post Office every Tuesday.

**Better Quality Feed Assured This Fall**

The general quality of feed being sold in North Carolina is showing a steady improvement, according to D. S. Coltrane, Assistant Commissioner of Agriculture, who released figures on recent analyses completed at the State Department of Agriculture.

He said that 17 samples recently observed and analyzed were guaranteed to contain a total of 340 units of protein, but were found actually to contain 368.5 units. The average protein guarantee of these samples was 20 units per ton, whereas the average found was 21.68 units per ton.

Regarding the fat content of these samples, he declared they were guaranteed to contain 55.50 units of fat and the check-up showed 68.94 units, the average fat guarantee being 3.26 units and the average fat found, 4.04 units per ton.

The 17 samples were guaranteed to contain not more than 1662 units of fiber but they actually contained 152 units. The average guarantee was for not more than 9.53 units per ton and the average found was 9.00 units per ton.

**Unchanging—Through The Years**

Time does not dull the lustre nor weaken the solid strength of the monuments we supply. Handsome in design, reliably installed, their quality is everlasting.
