

## SENATOR SAM ERVIN SAYS

Washington—As this is being written, we are debating the defense budget in the Senate.

**Air Force Funds**  
I support the move by the Senate Appropriations Committee to raise the defense budget by \$1 billion to try to recapture the means on sufficient defense for our country. The defense cuts carried out by the Administration threaten our security as a free nation.

This is no idle comment, in sincere opinion, as I feel that from the testimony of top witnesses we have heard testify before the Air Inquiry Committee which I am a member.

As a consequence of this inquiry, it is reasonable to assume that the defense cuts may be half-

### Textiles

There is a move afoot to tack on an import quota amendment for

textiles when the Foreign Aid Bill comes up for action in the Senate. Senator Green was unsuccessful in getting his amendment accepted by the Foreign Relations Committee. I plan to support with all my ability legislation to halt what I believe is a complete perversion of the original idea of reciprocal trade, and the virtual disruption of a vital segment of our economy.

### Foreign Aid

There is strong sentiment around Congress that the Administration has failed to make out a case for increased foreign aid spending. Here is a basic and fundamental issue. It cannot be brushed off lightly. The Senate is likely to support the cuts that the House made. For two years I have carefully followed the arguments that have been made for increased foreign aid. I have not been convinced that the arguments are sound.

There was a need to help struggling countries after the war. We did that, restoring many nations to better economies that they enjoyed prior to the war. I subscribe to the theory of military aid and some technical assistance, but think that foreign economic aid cannot be justifiably increased at this time.

Atomic Age

Our attention was directed to the slow but sure rate at which our civilization is moving into the atomic era. Last week the Senate passed a bill authorizing the construction of an atomic-powered merchant ship. The President pushed hard for this and the Congress was glad to go along with the idea.

### Other Legislation

The Senate also passed and sent to the House a bill to change government budgeting and accounting procedures as recommended by the Hoover Commission. It would require government agencies to prepare budget estimates on the basis of accrued annual expenditures. It is designed to eliminate the multi-billion dollar carryovers of funds for defense, foreign aid and the like.

## Farm News

By R. M. THOMPSON  
Perquimans County Agent

There have been several indications of manganese deficiency showing up in soybeans and corn in the county already. This is the same type of trouble that we have had for the past two or three years. It usually appears where there has been heavy liming in the past or where a truck load of lime has been placed on the end of a field to be transplanted. Unless corrected, this can cause a large decrease in the amount of soybeans harvested and is a deficiency that cost very little money or time to correct. The high PH caused by the lime appears to be in the soil to an extent that manganese is not available to the plant. If manganese is applied in a solution to the rate of 3 pounds of solid manganese to the acre this deficiency can be corrected temporarily and there will be an appreciable decrease in yield for this year. The symptoms of manganese deficiency in soybeans are yellowing of the leaves with greenish mid-ribs. This same symptom holds true in pear-

MISS GLENNA ROSE WESLEY whose engagement to Carlton White Rountree, of Belvidere, has been announced by her parents, Mr. and Mrs. Robert Erskine Wesley, of El Dorado, Kansas.

nuts. If corn has this deficiency there is a green and yellow streaking of the leaves with the outer edges of the leaves turning pink. There are a great deal of fields in the county showing these symptoms and in case of dry weather there probably will be more. If manganese deficiency is one of your troubles please attempt to use this spray using three pounds of manganese. Manganese is available at the farm agent's office and the type of manganese used this year is very soluble in water.

Japanese beetles have arrived in the county in large numbers again this year. As in the past, they have attacked our fruit trees and grape vines first and are moving on to the corn fields and soybean fields after there is a build-up in the number of beetles. These insects can be controlled in the fields by using 10 per cent DDT or Toxophene.

If dust is applied to fruit trees and I certainly would recommend that you consider using rotenone at the rate of 3 pounds to 100 gallons of water as this would give you the safest spray when the fruits are near maturity. Rotenone does not have the lasting effect that DDT has but it is the safest to use where the fruit will be consumed within 30 days. In most instances it is not practical to dust corn fields for Japanese beetles

as corn is usually planted in 24 hours after the silk appears. The beetle does his damage to corn by cutting the silk off and this permits water to get in the ear and cause damage. In some cases dusting soybeans for beetles will pay. It depends on the amount of damage and the build-up in the number of beetles in the field. I would certainly suggest trying to control the beetles on all fruit trees, but do consider carefully the idea of dusting or spraying your corn and bean fields for Japanese beetle control.

## Gardens Cause Great Temptation Overload Freezer In Summer

At this time of year when gardens are beginning to yield, it is a great temptation to those who have freezers to overload them.

Anyone who has ever lost a friend because of imposition will understand what Nita Orr, Extension frozen foods specialist at State College, means when she says that a freezer is one of today's housewife's best household friends and it pays to use it properly.

The most common imposition on overloading the freezer with unfrozen food. This is asking the freezer to do a bigger job than it

### THE WOMEN WHO SHAPED NEHRU'S LIFE

Ever since he was a child, India's mystic Prime Minister has been surrounded by females who shaped his career. You'll learn the mystery of this powerful personality in the revealing article appearing in July 8th issue of

THE AMERICAN WEEKLY Magazine in Colorgrature with The BALTIMORE SUNDAY AMERICAN On Sale At Your Local Newsdealer

Misuse of a freezer can be avoided by following the manufacturer's instructions on where and how to place unfrozen food in the freezer. After the temperature of the food becomes zero degrees, Miss Orr adds, the food should be stacked close together to conserve space. Never put unfrozen food on top of frozen food, for it is likely to affect the temperature of the frozen food, thereby lowering the quality.

Storage temperatures should be zero degrees or lower with freezing temperatures below zero if possible. The importance of correct temperature cannot be underestimated, for it is the keynote to good frozen food. Good packaging is its close ally. One without the other would destroy the value of the other.

## TAYLOR THEATRE EDENTON, N. C.

Saturday Continuous from 1:30  
Sunday, 2:15, 4:15 and 6:15

Thursday and Friday, June 25-26—  
All Star Cast in "HELEN OF TROY" CinemaScope With Stereophonic Sound

Saturday, June 30—  
Peggy Castle in "TWO GUN LADY"

Sunday and Monday, July 1-2—  
Glenn Ford and Ernest Borgnine in "JUBAL" CinemaScope

Tuesday, July 3—  
Edmund Gwenn in "THE TROUBLE WITH HARRY"

Coming... July 4-5-6—  
Susan Hayward in "TLL CRY TOMORROW"

**HI-WAY 17 Drive-In Theatre**  
EDENTON, N. C.  
Edenton-Hertford Road  
CinemaScope Screen

Friday and Saturday, June 29-30—  
John Wayne in "SANDS OF IWO JIMA"

Sunday, July 1—  
John Agar in "REVENGE OF THE CREATURE"

Monday and Tuesday, July 2-3—  
Jane Powell in "HIT THE DECK" CinemaScope

Wednesday and Thursday, July 4-5—  
Jean Peters in "THREE COINS IN THE FOUNTAIN"

# Most modern truck V8's ...and the pounds prove it!

Pound for pound, the most powerful truck V8's today are Chevrolets. That's one way you can tell they're the most modern V8's going!

Chevrolet's modern short-stroke V8 truck engines do more work for their weight than any other V8 in any truck today! That means they carry around fewer pounds for power they develop. (They weigh up to 200 pounds less than other comparable engines!) It means, too, that less of the maximum truck G.V.W. consists of engine weight—and more is devoted to payload. Stop by and let us give you the facts on Chevrolet's compact, super-efficient truck V8's.

Weigh the facts... and you'll choose today's most modern trucks!

- Wasted weight is engineered out of Chevrolet truck V8's!
- The ultra short-stroke Chevrolet's truck V8's makes possible a rugged yet compact cylinder block. Modern design cuts down engine weight and increases engine efficiency.
- More power per pound means more power for your payload!
- Since less power is used in moving engine weight, a bigger proportion is available for moving your payload. You get more saving performance on the job. And modern V8 power saves dollars, too!
- There's a modern V8 for every Chevrolet Task-Force truck!
- There's a powerful, deep-breathing V8—either standard, or optional at extra cost—in every Chevrolet truck model. Horsepower ranges as high as 195 for fast, efficient high-tonnage hauling.
