Grazing Permitted On 1961 Feed Grain Land

The Perquimans ASCS Office received the following telegram today permitting the grazing of 1961 feed grain diverted acreage, according to George Bellman, office manager.

The telegram read as follows: "In view of the fact that a participant in the 1961 Feed Grain Program may now cultivate or plant diverted acreage for harvest in 1962 and in consideration of the problem of some producers who are faced with unreasonable cost for fencing in order to utilize adjoining stalk fields or get livestock to an available water supply the 1961 Feed Grain Program regulations are being amended to authorize turning livestock on designated diverted acreages on and after this date."

The amended regulations of the 1961 Feed Grain Program are expected to aid many participants of the program in Perquimans County.

TB Association In Meeting On Friday

Dr. Frances Noblin, member of the medical staff of Eastern Sanatorium, Wilson, N. C., disclosed in her address Friday night before the board of directors' meeting of the Pasquotank-Perquimans-Camden Tuberculosis Association, held in the Agriculture Building, that great progress had been made in the treatment of tuberculosis but much to be done in the field of case finding. Dr. Noblin's topic was "Case Finding, the Keystone to the Radiation of Tuberculosis." Dr. Noblin said the campaign against tuberculosis might be more effective and reach more people if TB sanatoriums were called chest hospitals, that every person should be educated to have an annual chest examination, pointing out that many people are afraid of finding out what is really wrong with them, emphasized chest X-rays uncovered early TB, lung cancer and other chest diseases and stressed the importance of the sale of Christmas Seals play in getting indigent examined, treated and in many instances provide medicine, not to mention the mobile chest X-ray units and many other services provided through proceeds of the seals.

Dr. Noblin said approximately 2,500 Tar Heels have tuberculosis but do not know it—that the death rate may be down but every 17 minutes someone died in this country with TB, and every seven minutes someone develops the disease—that TB would continue to be a major health problem until the reservoir of infection is stamped out.

Dr. Noblin showed X-rays of actual cases which she has treated, revealing the results of drug treatment and the need to find cases in an early stage. Mrs. Joan Lassiter, nurse consultant, reported 93 patients from 12 boarding homes had been tuberculin tested and 67 chest X-rayed—a project of welfare, health departments and the TB Association. Mrs. Lassiter also reported tuberculin test for first and ninth grades in district area and will follow up with chest X-ray all positive reactors.

Dr. Noblin stressed the need for flu shots for all TB cases and other respiratory diseases and she had previously endorsed the use of vaccine for these patients and the chest check up.

The meeting was well attended by citizens from the three counties.

Fire Damages White Home Tuesday A. M.

The Hertford Fire Department answered a call to the home of Mr. and Mrs. Charles E. White, Jackson Grubb Street, Tuesday morning at 11:45. Considerable damage yet to be determined was done by smoke and heat to the home and its contents.

At the time of the fire no one was at the White home and the fire was noticed by a passing motorist, who turned in the alarm. Cause of the fire had not been determined Tuesday afternoon, according to Fire Chief Bobby Smith.

ASC Announces Cotton Referendum

The ASC office announced today that a cotton referendum will be held Tuesday, December 12, to determine if marketing quotas will be in effect for the 1962 cotton crop.

George Bellman, Perquimans County ASC office manager, stated this referendum is important to business men and all of us. In most areas more than half of the customers of business are farmers. This referendum has much to do with customers in the city. The annual cotton crop in North Carolina brings in approximately 38 million dollars of income. Our cotton crop is planted on 406,000 acres of North Carolina farm land and on 49,000 farms and 77 of the 100 North Carolina counties produce some cotton. Loss or curtailment of this 38 million dollar annual income from cotton would have an adverse effect not only on cotton farmers but on all of us.

There are 590 farms with cotton allotments in Perquimans County. These growers will be notified of their 1962 cotton allotments before the referendum is held on December 12.

Bellman stated, "We hope that every cotton farmer who is eligible to vote will realize the effects of this referendum and vote on Tuesday, December 12." Peanut producers are reminded to return their peanut marketing cards to the ASCS office when they have completed the sales of their 1961 crop of peanuts. If the card is returned by mail, the producer should sign the card on the inside and also enter the number of pounds of seed peanuts on hand.

CD Awards Night Program Nov. 30

The Community Development Awards Night Program is scheduled for November 30 at the Perquimans County High School. William Whitehurst, Community Development Council chairman, will be master of ceremonies for the event.
