**Nuclear Conductor**  
That's Mack Wilson's job: conducting visitors through the Vepco Nuclear Information Center at Surry.

There, he uses animated displays, movies and other aids to tell the intricate story of the atom in terms even children can understand. With a working model of a nuclear power station, he shows why this is such a safe, clean, economical way to produce electricity.

From the Center's observation deck, he can point to the real thing taking shape just a few hundred feet away. The \$327 million Surry Power Station, which will begin operation in 1971, is another of Vepco's giant steps into tomorrow.

Come see it all. It's open 10 a.m. to 4 p.m. daily, 1 p.m. to 6 p.m. on Sundays, just off Route 10 in Surry County. Mack Wilson will help you understand the mighty atom, and how the energy it creates will bring you a brighter tomorrow.
