Science Fair

Perquimans County students turned out last week when the judging began for the annual science fair held in Perquimans County. School personnel report that participation in the fair was substantially increased from previous years. For a list of winners names see related article on this page. (Photos by Pat Mansfield)

voting on more than just candidates in the primaries on May 8. An amendment to the North Carolina Constitution creating an agency to issue revenue bonds to finance agricultural projects will also be decided.

In recent years industrial, manufacturing and pollution control facilities, health care facilities and housing, and public power facilities have all joined the list of proper purposes for State borrowing through the issuance of revenue bonds.

The proposed amendment to the North Carolina Constitution would add to this list agricultural projects.

A complete explanation of the amendment and how it will work is available in a new pamphlet issued by the Department of the Secretary

Modestly titled 'AN EXPLANATION OF THE PROPOSED AMENDMENT TO THE NORTH CAROLINA CONSTITUTION TO CREATE AN AGENCY TO ISSUE REVENUE BONDS TO FINANCE

ELECTION ON MAY 8, 1984," the pamphlet is also available from the County Board of Elections in each

Hoping to make North Carolina citizens more aware of proposed amendments to their consitution, the 1983 General Assembly created the "Constitutional Amendments Publication Commission."

This three member body is composed of the Secretary of State who serves as chairman, the Attorney General and the Legislative Services Officer.

Sixty days prior to an election in which a constitutional issue will be voted on, this commission must prepare an explantation of the issue in "simple and commonly used language."

The explanation is printed by the Secretary of State and distributed to the county boards of election and to anyone else who might request a

Secretary of State Eure feels that this new service will aid North Carolinians in making a more effective decision on the constitutional amendment.

Facilities responsible for school climate

(Editor's Note: The following is the second in a nine-part series of articles that have been compiled by the Perquimans County School Administration staff. These articles are being provided in an effort to educate the general public of the needs facing the county today.)

School climate and school spirit are closely realted aspects of the school setting. Both a healthy school climate and a vibrant school spirit are dependent on support received from outside the school, from the community in which the school exists.

Students at Perquimans High School recently expressed the opinion that pride in one's school is perhaps the most important aspect of a healthy school climate.

That pride is developed in students in part when they see that the facilities in which they learn as just as good as the facilities of other schools which they visit and against which they compete in athletic and other contests.

The provision of adequate school facilities by a community creates within students the feeling that the community values them and places worth on what they are doing.

Students also feel that all workemen should be provided the proper tools with which to do the job expected of them. If, for example, the job of acquiring scientific knowledge is an expectation which the community has of students, the students need well planned and thoroughly equipped science labs in order to perform as expected.

If students are to meet the expectation that they express themselves musically and artistically, proper learning areas in band and art must be provided.

Students and teachers, like any other workmen, who have been given a task to do are more likely to perform efficiently and with love for their work when the resources they need to do the tasks assigned them have been provided.

One important evidence of a healthy school climate is a "can do" attitude on the part of students and

Students and teachers who know they have been afforded every chance to succeed and to develop their abilities (in this case adequate facilities) have a much better chance of developing a "can do" attitude about themselves

next month.

The winners were:

On Friday, March 9, Northeastern North Carolina Tomorrow sponsored an Economic Development Conference entitled "Jobs for the Future of Northeastern North Carolina."

The conference was attended by approximately 100 people at the K. E. White Graduate and Continuing

Governor Jim Hunt

Education Center on the Elizabeth City State University Campus.

Governor James B. Hunt Jr. addressed the conference, along with members of his Cabinet. Hunt reaffirmed the State's committment to build a "vigorous and healthy economy in Northeastern North Carolina" and to protect the "natural beauty and the good communities that make this part of our state so

Hunt stressed many needs for this area, among them, education, job training, water protection and quality, good roads and bridges and airports.

In order to accomplish these needs, Hunt said "We must have a good working relationship between local, state and federal government. Each level of government has a special job to do to help create growth and new

Local leaders were challenged by Hunt to develop a local strategy to fit their communities special needs. state and local cooperation Hunt believes that an economic growth strategy can be developed.

The group was also addressed by

James A. Summers, Sec. of Natural Resources and Community Development; Wesley Webster, Deputy State Transportation Secretary; Sara W. Hodgkins, Secretary, Dept. of Cultural Resources; Charles N. Fitts, North Carolina Economic Development

Items of local interest mentioned were the Community Development Block Grant Program. This region has received over \$15 million in community revitalization funds and \$2 million in economic development

Mayor W. D. "Bill" Cox of Hertford was lauded for his hard work on the route 17 project.

The group was also treated to a premiere of a film commissioned by Northeastern North Carolina Tomorrow. This film will be shown at the Visitor's Center in Manteo during the 400th Anniversary.

Those attending were praised for work already accomplished and encouraged to continue to work to improve the quality of life within the 16-county area that comprises Northeastern North Carolina.
