"Why am I smiling now?"

Thanks to an amazing new hearing technology, I'm once again enjoying the benefits of better hearing!

**N**ot long ago, I had a problem communicating with friends and loved ones. I could hear them, but I couldn't understand what they were saying.

I thought I couldn't be helped until I visited my Hearing Health Professional. He tested me and said I was suffering from Nerve Deafness, a type of hearing loss that affects millions of people just like me.

He also told me there is an amazing new hearing technology that could help me. Already, thousands of people, including President Reagan, are

understanding others clearly thanks to the INTRA II canal hearing aid. This hearing aid is so tiny, you probably can't see that I'm wearing it right now! In fact, I even forget I'm wearing it!

Take my advice and don't wait any longer. If you or someone you know has a problem hearing and understanding, take the first step: Call your Hearing Health Professional today for a complete hearing test and evaluation. Once you begin enjoying the benefits of better hearing, you'll feel a lot better about yourself just like I do.

Respectfully,
