North Carolina G. E. Dealers Buy Trainload of Refrigerators

As a result of the January Preview Showings held in Charlotte by L. W. Driscoll, Inc., North Carolina Distributors of General Electric Appliances, their dealers placed orders for more than 2000 refrigerators making up 32 solid carloads. These same appliances are now being shown in dealers' stores all over North Carolina.

The enthusiastic acceptance of the new 1939 G. E. Refrigerators, featuring Selective Air Conditions, is unprecedented in the history of electric appliance merchandising in North Carolina. Never before has such a large single shipment of refrigerator been purchased by one distributor's dealers. The General Electric dealers and salesmen have expressed confidence that 1939 will exceed the previous high sales records of 1937 and 1938 in the total retail sales of G. E. Refrigerators in the state.

According to the local General Electric Appliance Dealer Mr. D. P. Hord of the Hord Furniture Co. "The new refrigerators are not only beautifully styled, but equipped with every tested and proven modern feature. Actually five different 'Selective Air Conditions' are available for proper food storage. Dry or moist cold is available according to the special requirements of various foods, and subfreezing, freezing or standard refrigeration temperatures may be selected by the housewife to give her a more flexible and modern food storage plant for her kitchen than has ever been provided heretofore."
