

TROOP FIVE NEWS

Last Monday at Scout meeting the entire Pauline community saw a short moving picture of the "100th Anniversary of Baseball," and a selected short on "Let's Go Fishing."

The two together made a good entertainment. The program was sponsored by the Fisher Body and General Motors Corp. and presented by Joe Lee Woodward.

Immediately after the show the Scouters of Troop 5 went in the club house and talked of Camp and how we're going to win a hatchet this year. (We sure do need one.)

We have on display for the day a miniature Field Day. This will take place on the Pauline ballground. I hope, more or less, to give you the winners next Thursday.

Sluggish Citizenship Criticized by Editor

Atlantic City, N. J., June 6.—(IPS)

No government and no individual leader can successfully do the work for a "lazy citizenship. Dr. Barclay Ketchum, editor and writer, recently told members of the New Jersey State Federation of Womens Clubs. No social order, no form of government, no political demagogue, is going to solve the problems for a lazy or impotent citizenship, he declared. What we have now is about all a self-respecting man could ask for—namely, a chance to solve his own problems in his own way.

Viewed in the large, and in the terms of a hundred years, we have made the most extraordinary progress of any nation on the face of the earth, and our problems are not those of failure but those of success.

Germany, Italy and Russia today are adjusting themselves to the same technological problems that we have, but with their form of government they require detention camps, firing squads, bloody purges or wars of aggression to survive. Thus in any field, seen through the perspective of time, we are attaining the higher levels of social justice every one wants faster than they are.

Declares Machines Make Living Easier

New York, June 6.—(IPS)—Electrical aids to modern living in America are equivalent to the services of 22 slaves per family. Walter Robbins, Director of the Sangamo Electric Co. declared here recently in an address before the Federal Bar Association. He said these slaves have been grown under the shelter of the American patent system, "which gives us new ideas and puts them to work by offering incentive for inventors to invent, manufacturers to manufacture and investors to invest."

"Man, without the aid of machinery, has physical strength equivalent to about one-tenth of a horsepower," he said. "The modern factory worker has mechanical equipment of approximately five horse power aiding him in his work. At his side are fifty unseen slaves helping him produce. For the nation as a whole there are 22 electrical slaves per family. The rise in the American standard of living has paralleled this increase in mechanical slavery. The four-fold rise in real wages — income in terms of goods and services — can be credited more to that factor than all others put together. The development of new mechanical devices for the future is dependent upon the same type of patent protection we have had in the past."

Church News
Presbyterian Church

Anti-Flatmen
Used many years for the relief of upset stomach, excess acidity, indigestion, dysentery, colitis, and related stomach disorders. Separate prescription adults and children.
THE OLD RELIABLE

By George!
Kings Mountain sports enthusiasts are all adither over something or other this week. Every baseball fan is either talking about "Dink" Benetts' Pinix Booster team, or about Jake Early's appointment to the number one catchers' position with the Senators, while the football fans are raving about Little's resignation. It was generally agreed a week ago among the latter that next fall would find Little still around Kings Mountain. In fact, he almost told yours truly that he would be back. But he's hardly out of town when we hear the rumor that he might go to Davidson. As early as Friday afternoon the word got out. We didn't know what to think. Then, Monday morning it goes a little further, and by Monday afternoon it's in the bag. Then, in the middle of the stew, Ed Smart, the man who is the most logical man to fill Little's shoes here sties thru town and waves at us while we stand on the corner. He can't stop to say "Howdy" to anything else. He probably knew that if he did, he'd be swamped with questions about the mess. Then we try to get Mr. Barnes and his out of town. Thought maybe he'd like to help us out a little. So all we can do is sit around 'til some thing turns up, and hope that maybe the best basketball player in Cleveland County can show his stuff with the Mountaineer football team next fall.

The U. S. Department of Commerce has reported that daily average sales of general merchandise in small towns and rural areas for April were 11 percent above the same month a year ago.

IT'S BEAUTIFUL! IT'S THRIFTY! IT'S A BARGAIN!

A Finer G-E Refrigerator with Selective Air Conditions

Get the Inside Story!
General Electric Selective Air Conditions provide different combinations of temperature and humidity that keep foods at their fullest, finest flavor—preserve health-giving vitamins—and give you the most practical low-cost method of food preservation.

Now Priced Lower Than Ever
"SEE G-E!" That's the hot-tip among thrifty refrigerator shoppers this year. The new 1939 G-E is high, wide and handsome but way down low in price. Never before has America bought so many G-E refrigerators in a similar period. It's a blue-ribbon winner!

- SEE**—General Electric's New Quick-Trays that release two or more cubes at a time—freeze up to 48 lbs. of ice in 24 hours and other features that make G-E the "blue-ribbon" refrigerator of the year.
1. Sub-freezing Storage.
 2. Low Temperature with High Humidity Storage.
 3. Moderate Temperature, High Humidity Storage.
 4. Safety-Zone General Storage.

1. Selective Air Conditions perfected at world's greatest electrical research laboratories
2. Stained steel super-freezer with removable shelf
3. Fast freezing, easy releasing Quick-Trays
4. Easily adjustable storage space, sliding shelves
5. All-steel cabinet, one-piece porcelain interior
6. Simple, quiet, sealed-in steel Thrift Unit
7. Forced-air lubrication and Oil Cooling
8. Enduring economy proved by 13-year record
9. Thrifty in price, in current, in upkeep
10. Product of the largest and oldest electrical manufacturing company in the world

The sealed mechanism with a record for quiet operation, low current cost and long life.

PRICES START AS LOW AS \$154.50

FACTS FAVOR FORD

- 1 The 1939 Ford V-8 is a beautiful, modern motor car. Its 85-horsepower engine gives you economical, well-balanced performance over the entire speed range—and the 60-horsepower engine is even more economical.
- 2 The structural strength of the Ford car—frame, bracing, axles, body—makes not only for safety, but durability and long life.
- 3 Ford hydraulic brakes are exceptionally large and strong in proportion to car weight.
- 4 The Ford car is stabilized for comfortable riding. Its springbase, the distance between front and rear suspension, is 123 inches. Seats are toward the center, perfectly balanced. The car does not bob or dip and can have very little sway.

These four points—power, strength, safety, comfort—are by far the most important essentials in any motor car. They form the basic value of your investment.

With this solid foundation to build on, the Ford V-8 has been made beautiful, spacious, easy to drive. It is richly upholstered and has all the modern features which add to the luxury and pleasure of motoring.

You can see these things when you take a trial drive, but do not forget that the main value is in the things you do not readily see—quality of materials, precision of manufacture, fundamental engineering.
