PHONES 10-R AND 88 MRS. A. H. PATTERSON, Editor

### HORD-FALLS WEDDING SOLEMNIZED

A wedding of simplicity and quiet charm was that of Miss Ethel Hord to Jonah Falls, both of this city. The ceremony was performed at 9:00 o'clock Sunday, Dec. 24, at Saint Matthews Lutheran church with Rev. L. Boyd Hamm, pastor of the bridegroom, officiating, using the

The church was banked with lovely ferns and on the altar were white gladjol and candelabra holding white tapers which were lighted by Miss Eunice Hord, sister of the bride, and Miss Ottilie White.

The nuptial music was rendered by Miss Rachel Grigg of Gastonia. Miss Lois Moore sang, "The Sweetest Story Ever Told." Lohengrin's Bridal March was played for the processional and Mendelssohn's Wedding March for the recessional.

The bride and bridegroom entered together. The bride was charmingly attired in a dress of hat of China tea with coat of white and green and brown accessories. She wore a shoulder corsage of white man roses and lilies of the valley.

Mrs. Falls is the daughter of late Rev. and Mrs. J. T. Hord, and a girl of charming personality and lovely disposition. She is an employee of Vera's Beauty Shoppe.

Mr. Falls is the youngest son of Mr. and Mrs. G. P. Falls. He is employed by the Neisler Mills.

After a short trip the couple will be at their home on the York Road.

### Boll Weevil Control Reports Favorable

J. O. Rowell, Extension entomologist of State College, says that encouraging reports of boll weevil control through the 1-1-1 molasses poisoning treatment continue to pour in to his office. As an example of the effectiveness of the control measures advocated by the Extension Service, Rowell quoted the following report from F. W. Reams assistant farm agent in Halifax County.

"Three farmers — C. H. Smith of Scotland Neck, R. Hunter Pope of Enfield, and J. G. Shields of Scotland Neck — averaged 499.7 pounds of lint per acre on 276 acres treated with the molasses poison.

Farmers not using poison made average yields of from 150 to 200 pounds of lint per acre, with a number of growers reporting less than 100 pounds per acre.

"Mr. Smith made a yield of 150 pounds per acre on 37 acres, where the cotton was grown on land that had a good growth of lespedeza turned under. Mr. Pope reported an average of 498 pounds of lint per acre on 211 acres. Mr. Shields grew 493 pounds per acre on 28 acres.

Rowell explained that the 1-1-1 treatment consists of mixing one pound of calcium arsenate with one gallon of water and one gallon of cheap molasses, and mopping the cotton beginning several days before the squares form, and continuing at the rate of one application per week until at least three applications are made.

"The best results are obtained
