

Patterson Grove Section
June 24: Hi folks! Sorry to disap-
point you but here I am again. Oh
un-lucky one! I get my first chance
to write-up a church wedding—and
what happens? The bride and groom
say "No publicity please!" That's
just another reason why columnists
get gray! I will say the that the
church was beautifully decorated.

Physically Prepared For
National Service
RALEIGH, June 24.—The im-
portance of immediately preparing
young men and women physically
for universal service through means
at the disposal of governmental and
cooperating State and local units,
was emphasized by Dr. Carl V. Rey-
nolds, State Health Officer, in a
statement issued here today. He
urged that no time be lost in pre-
venting the preventable, protecting
the protectable and curing the cur-
able, order that American youth
when it goes into centers of training
will not be inviting enemies or ep-
idemics in these centers, but will
be fortified against these risks.
Dr. Reynolds said:
"Today, I saw nine billions of
dollars being appropriated for the
national defense.
"Today, I saw plans in the mak-
ing for universal training.
"Today, and tomorrow, we need
the man and the woman who is
sound in mind and body, to guide
direct and operate our preparedness
program.
"Delay means waste of both time
and opportunity. Procrastination is
the thief of time whose loot is never
recovered.
"Man's physical fitness is essen-
tial in war or peace—it is an integral
part of preparedness.
"Today, we need the means to
take advantage of the protection
that already is at hand. It is essen-
tial and should be forthcoming —
on a well balanced budgetary basis.
Monies thus wisely made available
will not only brook immediate needs
but will result in an educational pro-
gram that will not become obsolete
—but endure. Prodigal spending is
to be deplored, but it is wise to be
generous in expenditures that profit
us most.
"Medical science and research

of material we are not using as ad-
vantageously as we should in our
preparation for life's work, either in
times of peace or in preparation for
war.
"Today, I saw a horse — sound
and sleek — manufacturing anti-
bodies, to immunize against the rav-
ages of disease.
"Six days hence, this horse will
act as a donor, giving up a known
quantity of blood to save the life of
dear, dying man.
"Today, I saw a calf that had man-
ufactured protective agents for the
welfare of man — a rabbit and a
gulfena pig doing the same thing.
"What science has provided, let
us take — without hesitation, which
spells loss!"
