

Cotton Referendum Plans Being Made

E. Y. Floyd, AAA executive officer of N. C. State College, has called upon county and community Triple-A committeemen and county farm agents to begin preparations for the cotton referendum which will be held Dec. 7. Cotton growers throughout the Nation will vote at that time on whether they wish a marketing quota to apply to their 1941 crop.

Cotton marketing quotas have been in effect for the past three years. The 1940 quota was approved last fall by 91.2 percent of the Nation's growers. North Carolina farmers gave quotas a 89.8 vote of approval, 50,737 voting for quotas and only 5,767 voting against quotas.

The secretary of agriculture declared a 1941 marketing quota in September, Floyd said, when it was determined that the supply of American cotton on Aug. 1, 1940, totaled 24,900,000 bales, or 137 percent of the normal supply. Under the Agricultural Adjustment Act a quota must be declared when supplies reach 107 percent of normal.

The National quota for 1941 is the same as the one in effect this year and will make possible the marketing thru the quota program, of about 12 million bales during the year beginning Aug. 1, 1941. This will mean that individual farm allotments will remain the same in 1941 as they were in 1940.

Floyd further pointed out that, with marketing quotas in effect, farmers who plant within their allotments may market without penalty all cotton which they produce in 1941. Farmers who overplant their acreage allotments or who have penalty cotton from a previous crop must pay a penalty of 3 cents per pound on all cotton marketed in excess of their farm marketing quotas.

Rail oddities

1939	
TAXES	REVENUE
Income	1,200,000,000
Corporate	1,000,000,000
Excise	1,000,000,000
Other	1,000,000,000
Total	4,200,000,000

TO PAY THEIR TAX BILLS, THE RAILROADS WORKED 32 1/2 DAYS LAST YEAR. IN 1929 TAXES TOOK THE RAILROADS' TOTAL RECEIPTS FOR ONLY 23 DAYS.

ONE HUNDRED YEARS AGO THERE WERE LESS THAN 3000 MILES OF RAILROAD IN THE UNITED STATES. TODAY THERE ARE 40,118 MILES ENOUGH TO MAKE 133 PARALLEL TRACKS BETWEEN NEW YORK AND SAN FRANCISCO.

THE AVERAGE LOCOMOTIVE CONTAINS APPROXIMATELY ONE MILE OF BOILER TUBING.

410,118 MILES

ASSOCIATION OF AMERICAN RAILROADS

Farm Questions

Q.—What is the best method of feeding hogs?
A.—The self-feeder is best for feeding fattening hogs. It saves labor and feed, is an ideal way to utilize dry feed, helps keep feed clean, and enables each pig to select his own ration. Where nursing sows are self-fed, the pigs will learn to eat from the feeder before weaning time. When the sows are taken away, the pigs may be continued on the self-feeder without interruption.

Q.—Is it necessary to cut cotton stalks after the harvesting operation is finished?
A.—It is advisable to cut all cotton stalks and uproot the stubble as soon as the last cotton can be picked in the fall. During the winter, destroy debris, grass, and weeds from ditch banks, hedge rows, and from the first 100 feet of woods nearest cotton fields. The burning of woods to destroy boll weevils in hibernation is not recommended.

Q.—How should one select outlets in building terraces?
A.—Consider the future development of uncultivated land in selecting outlets. Good outlets are: pastures, timberlands, and streams. Other satisfactory outlets are: natural draws roadside ditches; fence rows, and artificial ditches at property lines. Outlets must slope away from the terraced field. Protect terrace outlets from erosion, and don't permit a gully to form at the terrace outlet.

English farmers are being urged to gather acorns, horse chestnuts, and beechnuts to eke out the feed-stuff supply of farm animals and thereby release tonnage for other needed imports.

Railroad revenue from automotive freight was \$425,556,000 in 1939
