Smile! and the World Smiles with You!

The Voice With a Smile is contagious—it makes friends—it's a real social and business asset. Many times people form their impression of you by your voice and the manner in which you telephone.

What are the points of a pleasing telephone personality? To speak pleasantly, of course. And to be considerate and courteous—such things as answering promptly, talking directly into the mouthpiece in a normal tone of voice, and hanging up the receiver gently when the conversation is completed.
