Farm Questions

Q.—What size eggs are best for hatching?
A.—In a recently published circular (No. 249) by the State College Extension Service on "Incubation," the following sizes of eggs are listed as acceptable for hatching under the National Poultry Improvement Plan: U. S. Approved and U. S. Verified, not less than 23 ounces per dozen in weight; U. S. Certified, not less than 24 ounces per dozen; and U. S. Record of Performance, not less than 25 ounces per dozen, and a minimum individual weight of two ounces. The other three grades require individual weights of not less than one and 11-12 ounces each.

Q.—How can scab on apple trees be controlled?
A.—When the flower buds show the first signs of pink color, H. R. Niswonger, Extension horticulturist of State College, says a spray should be used, made up as follows: Mix liquid lime sulphur with water at the rate of 1-1/2 gallons of sulphur to 100 gallons of water. Complete this spray period within a few days. Some growers add one pint of nicotine sulphate to the lime sulphur for control of aphids.

TO APPEAR SUNDAY MORNING AT FIRST BAPTIST

On Sunday morning, 11:00 o'clock at the First Baptist Church, the Mars Hill College Choir composed of thirty students under the direction of Miss Elizabeth Ellison and accompanied by Miss Martha Biggers at the piano and Miss Mildred Gwin on the violin, will present the life of Christ in song.

The program has been carefully and logically worked out by Miss Ellison. Following the main events in the life of Christ from the prophetic, birth, life, crucifixion and resurrection, it ends on the note of praise and adoration. Walter Har-

risson will introduce each phase with the reading of appropriate scripture.

All music lovers of the town are cordially invited to enjoy this hour of special worship in song.
