 Evening Worship 7:00.
 Prayer service Wednesday evening 7:00.
 worship with us.
 All are welcomed to come and

NEGRO NEWS

(By Jessie G. Costner)

Mrs. Lelia Jackson, 45, died on Tuesday, May 6, 1941, at her home in the Compact community. She was the widow of the late Mr. Tom Jackson. Mrs. Jackson was born in York, S. C., and came to this community about 30 years ago and had lived here since that time. She was one of the founders of St. Paul Methodist Church and was a member of that church at the time of her death. She was a member of the Woman's Society of Christian Service. She was a good citizen and a good neighbor.

Funeral services were held Friday May 9, at St. Paul Methodist Church with the Rev. B. F. Gleaves of Maxton, N. C., and the Rev. G. W. Patterson, pastor, officiating.

Interment was in the A. M. E. Zion cemetery at Kings Mountain.

Surviving are: two daughters, Miss Fearlene Jackson and Miss Maudine Roberts, one son, Mr. Thomas Jackson, Jr., of the Compact community, one niece, Mrs. Eunice J. Shadd of High Point and three grandchildren, and many relatives and friends.

Mr. Dock Meeks and daughter, Miss Lizzie Meeks of York, S. C., visited Miss Fearlene Jackson last Sunday.

Mr. C. W. Costner of Gastonia and Mr. James L. Broome of Hickory were visitors in Kings Mountain Monday.

Mrs. Geneva Carroll of Tracy Street has been ill for several days. A dedicational service was held at the Ebenezer Baptist Church last Sunday. The principal speaker was the Rev. E. E. Gregg, pastor of Third Street Presbyterian Church, Gastonia.

Four of the Davidson High School girls took part in a track meet held at Tuskegee Institute, Tuskegee, Ala., Thursday, Friday and Saturday of last week. The girls participating were: Edna Mae Roberts, Dorothy Byers, Evelyn Brown and Nina Wilson.

Mr. Jerry Cassell of Compact is sick, but improving.

Master Elbert Roberts, Jr., and his little brother Harold, of the Compact community are leaving this week for High Point where they will spend the summer with Mr. and Mrs. Ervin Shadd.

Consumer demand for farm products will continue to improve in the remainder of 1941 under the stimulus of rising employment and consumer incomes, says the U. S. Bureau of Agricultural Economics.

Washington Snapshots

(Cont'd from front page)
 men and machines in them can produce are still being consulted.

The recent development is part of an interesting story which begins in 1919. In that year, the United States made plans for any future emergency which called for industrial mobilization.

As part of that plan, government officials made continuing surveys of some 20,000 major factories, to find out what defense goods they could turn out on short notice.

Last summer, however, it became apparent to some that in these days of mechanized warfare, the 20,000 factories alone could not do the whole job. So the question arose of what to do about getting more productive facilities.

Government agents could not do the job. They did not have enough industrial experts to canvass thousands of additional plants. They did not feel that questionnaires sent into these plants would produce results, because manufacturers already were getting questionnaire after questionnaire from the government.

So the National Association of Manufacturers and some 150 national, state and local manufacturers' associations affiliated in the National Council decided to do the job.

After a necessarily long period in which all government agencies were consulted about the information they might want, and creation of the machinery necessary to handle the inventory, the job was begun.

And now the findings have been turned over to government officials. In brief, this survey has covered in less than five months 18,002 industrial plants. A great majority of these are not included in the 20,000

surveyed by the government since 1919. So that as of this moment, the government knows exactly what some 38,000 plants around the nation can produce, what machines they have, how many employees.

This material not only is available in Washington, but in the offices of the state and local organizations which cooperated in the survey. It also has been turned over to scores of federal agents throughout the country who are placing government contracts and looking for sources of supply.

Washington officials feel that since the information was supplied voluntarily by men who know their own plants it means first that it is sound information, and second that it indicates a willingness to produce for defense. A manufacturer would hardly supply the information without expecting that he might be called upon to produce.

Such is the way of a free people.

Congressmen, incidentally, are still waiting for demands for economy from back home. They don't

want to vote the \$3 1-2 billions in new taxes and also vote millions for non-defense items which could be cut. But so far, their constituents are silent, although they probably won't be when next year's tax bills come due.

Meanwhile, they are appealing through Speaker Reayburn to the President to take the lead in reducing nondefense expenditures.

★ 29 MILLION!

A record never before approached!

★When the 29,000,000th Ford rolled recently from the assembly line, an all-time record for the industry was set. 29,000,000 units built by the same management and all bearing one name—a name that has become one of the best-known trade-marks in the world!

It is significant that this achievement comes at a time when our country is making a mighty effort to re-arm swiftly. For to further that effort, to help speed it along in any possible way, we have offered the vast facilities of the Rouge Plant and every ounce of our experience.

As you read this, a new \$21,000,000 Ford airplane engine plant, started only last fall, is nearly completed. A new magnesium alloy plant, one of the few in the

country, is already in production on light-weight airplane engine castings. Work is right now under way on a new \$18,000,000 plant for mass production of big bomber assemblies. Orders have been filled for military vehicles of several types, including army reconnaissance cars, staff cars and bomb service trucks.

In the midst of this activity for National Defense, building the 29 millionth Ford car is simply one part of the day's work.

The public has acclaimed the 1941 Ford car as the finest in Ford history. Ford Dealers are enjoying their greatest sales and expecting their best year since 1937.

It is good to be producing the things America needs, and to be setting records on the way!
