

BONDS OVER AMERICA

At Green Bay, when... there is a heroic... status depicting an Indian, a missionary and an explorer.

Spirit of Northwest

Many people from distant lands live in America making it a better place to live. For they know what America has meant to Norway, Denmark, Holland, Greece.

Keep on Building the Attack With War Bonds

Cut A Cord, Cook Axis Goose

When the big artillery shells of the AEF fell on Sedan, France, in early November 25 years ago, the East and West armies of the Kaiser were cut in two and the Kaiser's goose was cooked.

Then came the Armistice. Der Fuehrer's goose will be cooked one day, too, and then Tojo's. How soon depends on us at home as much as on our fighting men.

Planes, ships, tanks and guns are essential needs, we know, but just as essential are ammunition, equipment, food, medical supplies and a hundred other materials of war needed in each day's battle.

One of the essential products for hundreds of items of war today is pulpwood. It goes into the manufacture of smokeless powder, surgical dressings, mine cover, cargo parachutes, vests for aviators, weather-proof maps, containers for blood plasma, first aid kits, emergency rations, just to name a few.

Tons of food and equipment are shipped overseas each month in waterproof boxes and bags made of pulpwood which has replaced millions of pounds of critical metal.

Now the nation, at war, is suffering from a serious pulpwood shortage which can only be relieved by the farmers and woodcutters in pulpwood producing areas like ours.

We can't all work on the planes and ships and tanks and guns but every able-bodied man in the community can give them life by the fruits of his axe and saw.

Remember the Victory Pulpwood Campaign slogan:

"Cut a Cord of Pulpwood for Every Local Boy in Service"

We aren't asked to GIVE, but to cut a cord, with profit to ourselves and with service to the nation.

—THE HERALD 62.00 A YEAR—

AT FIRST SIGN OF A COLB USE 666 666 TABLETS, 240'S, 100'S BOTTLES

Next Year Will Be Different

NEXT year will be different. Not only the weather, and markets, and the needs of the country. Our jobs will be different, too. Because next year we're going to do those jobs differently—and we hope better!

We, whose job is producing goods and services, have been making resolutions like this for years. And we've been keeping them! For in our kind of business, you either keep on finding better ways of doing things, or—you go backward! And if enough people do that, the thing we call progress goes down.

That's why farmers keep on trying new seed, and fertilizers, and machines, and strains of stock. That's the reason industry carries on research—another name for a constant search for new knowledge and better ways to do things. Because most of us have been doing this for years. America has had the highest standard of living in the world. And it's the reason, too, that American production is doing so much today to bring victory.

After the war, America is going to need more than ever men with the courage and enterprise to invest time, money, and hard work in the search for better things. And if America's producers understand each other, and each other's problems, we'll be able to do these all-important jobs better. General Electric Co., Schenectady, N. Y.
