

How Germany is growing stronger

YOU MAY THINK Germany is growing weaker. But—

In many military respects, she is actually growing stronger. Here's how:

1. As Germany's lines of communication grow shorter, her military might will gather power, like a coiling spring. The Nazi armies that fought so furiously so far from home as Stalingrad and the Caucasus will fight even more furiously as the fighting approaches Poland and Germany proper.
2. Today Germany has 3 times as many combat divisions as she had when she attacked Poland 4 years ago. The divisions lost at Stalingrad have been

replaced, and Germany has raised or re-equipped a total of 60 new divisions. All told, Germany has 300 divisions!

3. The Germans now have 25,000,000 war workers in Nazi-dominated lands, as contrasted with 22,000,000 at the start of the war.
4. Germany can make and mount an industrial campaign. She expects to add 2,000,000 more war workers by Christmas in an all-out mobilization drive.

Allied air bombings have been effective, but the vast industrial power of Hitler's Europe is still high.

5. American officers returning from the front say that German prisoners are just as cocky and determined as ever.
6. German technicians are working feverishly on the development of new and deadlier weapons. One of these — the "magnetic" torpedo — has already begun to take its toll of lives and materials in the Battle of the Atlantic. Another, a rocket gun, has devastating fire power.

Nobody's trying to scare you. We're going to win this War. But the toughest fighting is still ahead — and War Bond buying must keep pace with the fighting!

The more men and the more money we can pour in now, the quicker we win. Buy an extra Bond — today!

KEEP ON BACKING THE ATTACK!
