What You Buy With WAR BONDS

When a soldier or a sailor is low in spirits there is nothing that will cheer him up as much as a letter from home, so the War and Navy Departments have devised a method for getting "the word" to its fighting men with the greatest dispatch. This is the microfilm method of transmitting letters, known to all of us as V-mail.

Any news from home is bound to please our soldiers and our sailors but the news they want to have most is the news from our production front and news that we are winning our fight against inflation by our savings and investment in War Bonds.
