From where I sit... by Joe Marsh

America and her "Underground"

We were sitting around after chores the other night talking about the progress of the war. Chad Davis was saying how, in spite of Germany's defeat, there was still the German underground to cope with.

"I don't worry about them," says Sober Hoskins. "So long as we got our own underground in working order."

"What do you mean—our underground?" says Chad. And Sober points out to the fields. "There it is," he says, "under that soil lies the most important weapon that we've got. American crops—from American fields—strengthening our positions overseas in a way no other underground can shake."

From where I sit, Chad's absolutely right. Whether it's for the glass of beer that cheers a tired soldier's spirits, or the bread that feeds our armies and our allies, every bit of grain that American farmers harvest is a part of America's great strength.
