Johnston Begins Swine Improvement

Johnston County farmers have started a program to improve their methods of swine production, according to Jack Kelley, animal husbandry specialist for the State College Extension Service.

Plans for the program were worked out by a group of growers in a recent meeting with Kelley, County Agent John Pfland, and representatives of Kingan and Company.

Several of the growers agreed to conduct swine sanitation demonstrations to show the best method of producing good and choice hogs that are free from worms. Kingan agreed to pay a premium for hogs in the demonstrations if recommended practices are followed.

Kelley says the program is the

first of its kind to be set up in North Carolina. Its purpose, he adds, is to encourage the production of better hogs in Johnston and surrounding counties.

The following points will be stressed:

Sows will be bred to a good boar. Pigs will be farrowed and raised on clean pasture.

Hogs will be fed a balanced ration consisting of grain, protein supplement, and mineral mixture.

A report giving the number of hogs raised and the number of pounds sold will be made to the county agent.

Large marketings of chickens are in prospect the next few months, says the U. S. Department of Agriculture.
