Course Planned For Farmers

Discussions on avariety of sub. lects will be presented in the Farm Management Short Course to be held at North Carolina cor State College from February 5 through 8.

The subjects include the out- ary look for 1952, farm records, chemical weed control, farm machinery, labor management and Bit supervision, leasing arrange how ments, production of livestock, we control of insects and diseases, mo and long-range adjustments tion needed in North Carolina ag-

The course is designated for eve professional farm managers, repsentatives of banks who handle farm loans, and farmers who debusiness unit, It is sponsored by land County. The Cleveland County the Society of Farm Managers ty Agricultural Workers Council and Rural Appraisers, the coll-has several thousand seedling ege'sDepartment of Agricultural which will be given free to th Economics, and the Division of farmer, or others wishing to d College Extension.

ion fee is \$5. Further information is available from local county agents or from Eugene Star. nes, Division of College Extension, State College Station, Ral-

Several tours will be made during the four-day course.

W. H. Pierce, C. B. Ratchford, M. S. Williams, and H. B. James will serve as chairman for various phases of the program. All discussion will be led by members of the School of Agriculture faculty and staff.

You can have fun figuring out your message from the Orient by use of this pleasant little letter puzzle. If the number of letters in your first name is 5 or less, subtract from 7. If more than 5 letters in your first name, subtract from 13. Now take this result and find your key letter in the word ORIENT at the top of this puzzle. Then, starting at the upper left corner, check each one of your large key letters as it appears from left to right. Below the key letters is a code message for you.

The dealers' employees, nearly three quarters of a million of them, are needed for the vital work of distributing, maintaining and servicing the new cars after the manufacture's work is done the survey shows, emphasizing the position of the new car dealer as a vital link in the national

A report based on the study conducted by the NADA's Public Relations Committee under Chair man J. Eustace Wolfington, of Philadelphia, also brought to light for the first time other outstanding facts about the nation's new car dealers:

The average new car and truck dealer has been in business more than 20 years.

New car dealers contribute more than 47 million dollars a year to religious, educational and charitable organizations in their communities—a sum larger than most important philanthropic

foundations can spend. They are lending 12 million dollars worth of cars annually to high school driver training pro-

Eight out of ten new car dealers are active members of civic clubs, more than half of them served as officers. Nine out of ten belong to com-

munity service organizations (Community Chest boards, Red Cross committees, Boy Scout councils, etc.) half holding office. Showing unusual interest in community affairs, 34% of the nation's new car dealers hold or have held public office in their ommunities, counties or states.

Sheep Investments Prove Profitable

If managed properly, a good flock of sheep is one of the most profitable livestock enterprises a North Carolina farmer could

This is the opinion of J. S. Buchanan, livestock specialist for the State College Extension an analysis of farm flock records rs in 11 counties.

The records show, says Bu-The flocks included the reports

"Out of thin air" HIGHEST HORSEPOWER in Buick history

o, we didn't have to build a new engine. We took Buick's valve-in-head Fireball

Engine-which makes the most of high compression. We drew on 12 patient years of Buick carburetion research.

And we came up with more might, more miles, from gas-right out of thin air, in more ways than one.

When you talk about "miles per gallon" you think of fuel, because that's what you buy.

But air's free-and for every gallon of gasoline, a busy engine can gulp more than 8,009 gallons of air.

The problem is to deliver air in the right proportions, throughout the full range of speeds at which you drive.

A carburetor-big enough to supply the air needed at full throttle-can be wasteful in stop-and-go driving. A carburetor sized for thrift in city traffic literally smothers your engine when you really give it the gun.

So Buick engineers developed the Airpower earburetor - a four-barrel automatic - and here's how it works.

Loafing along, two barrels are working. two stay closed. And you get a low-speed

TELEPHONE 330

As you pick up speed, the "stand-bys" come into play-feeding not just more gas, but more air too-so you keep getting maximum power from each drop of fuel.

You have 170 effortless horsepower when you need it-a tremendous reserve ready to go into instant action at the nudge of your toc.

You have the satisfaction of knowing that you get this power with a frugal use of gas. At 40 you use less gas than you formerly used at 30.

That's the story of Airpower carburetion in facts and figures straight from the factory. But statistics can't tell you the breath-taking joy of heading for new horizons in a greatpowered new ROADMASTER.

When can you do that? Better come in soon. Lots of other folks are flocking into our showroom these days to see the greatest array of new Buicks we've had in years.

Equipment, accessories, trum and models are subject to change without notice,

Sure is true
