Drugs to Combat Meningitis in Africa

Specialists of the World Health Organization (WHO), one of the U.N. Specialized Agencies, recently announced a new approach to the control of cerebro-spinal meningitis—the most widespread epidemic disease in Africa, after concluding studies in the Sudan. Following the announcement Chas. Pfizer and Co., Inc., made a gift of terramycin to aid the Government of Sudan to combat the disease in that region. Here, Dr. C. A. Werner (left) Overseas Medical Director of that firm makes the presentation of the drug to Dr. P. M. Kaul, Director of WHO's Liaison Office in New York, at U.N. Headquarters.
