

FORTUNE TELLER

ORIENT

2 3 4 5 6 7

YOU can have fun figuring out your message from the Orient by use of this pleasant little letter puzzle. If the number of letters in your first name is 5 or less, subtract from 7. If more than 5 letters in your first name, subtract from 13. Now take this result and add your key letter in the word ORIENT at the top of this puzzle. Then, starting at the upper left corner, check each one of your large key letters as it appears from left to right. Below the key letters is a code message for you.

Wooden Nickles Pay Off, Too

Maybe "taking wooden nickles" isn't such a bad idea after all, if that's the only kind your land will produce. John E. Gray, forester for Agricultural Extension Service of North Carolina State College, points out that there are thousands of acres of farmland in the State that is not suitable for cropping, but which could be turned into profitable investments by planting such land in pine trees.

There are three public nurseries where forest tree seedlings are grown for distribution to Tar Heel farmers, farm youth and the general public. In some counties, up to 5,000 pine seedlings are available free of charge. Your county agent has the details on this.

The section of the State which you live will determine the kind of trees you should plant in those large openings in existing forests, heavily cut-over or burned-over woodland, and broom-sedge fields.

Pines are recommended for upland soils, eroded hillsides, and dry sites. Hardwoods demand deep, rich moist but well-drained soils.

Mountain farmers will want to plant white pine except on steep dry southern and western slopes, under 2,500 feet in elevation. Black walnut can be planted as individual trees in rich, well-drained, wasted places about the farm.

For an illustrated circular on forest tree planting, see your county agent or write to the Publication Department, N. C. State College, Raleigh, for Extension Circular No. 371, "Plant Forest Trees."

comes before. In North Carolina, particularly, where the margin of profit is smaller than it should be, careless milking practices can mean the difference between success and failure as a dairyman.

Most dairymen, however, don't keep any production records and don't know just where they might be losing money. What the use of such records can do is shown by Dairy-Herd Improvement Association (DHIA) figures.

M/Sgt. Boyce Dixon Arrives In Germany

WITH THE 2ND ARMORED DIV. IN GERMANY — M/Sgt. Boyce E. Dixon, whose wife, Eva, lives at 501 E. Robinson st., Gaffney, S. C., recently arrived in Germany and has been serving with the 2nd Armored Division. Part of western Europe's NATO Army, his unit is conducting training maneuvers in the U. S. Occupation Zone of Germany. Called the "Hell on Wheels" Division, it was the first American outfit to enter Berlin toward the end of World War II.

Master Sergeant Dixon, a veteran of eleven and a half years Army service, has been awarded the Good Conduct Medal, Asiatic-Pacific Campaign Medal with two campaign stars, World War II Victory Medal, Army of Occupation Medal and the Korean Service Ribbon with three campaign stars.

He is the son of Mr. and Mrs. W. E. Dixon of King's Mountain, N. C.

The three most wide spread errors in management of turkey flocks are improper starting dates, feeding the birds too long before marketing, and keeping flocks that are too small to be profitable.

Littlejohn Rites Are Conducted

Funeral services for Robert Lee Littlejohn, 63, brother of Charles Littlejohn of Kings Mountain, were conducted Friday afternoon at 4 o'clock from Bessemer City First Baptist church.

The pastor of the church, Rev. Fred Forrester conducted the services with interment, with full military honors, following in the Bessemer City cemetery.

Mr. Littlejohn died at his home in Bessemer City early Thursday morning following a brief illness.

Surviving in addition to his brother are his wife, Mrs. Ferry Neal Littlejohn and a daughter,

Kathleen of the home. Pallbearers were: D. Hoke Coon, Hosiary Tarpley, Doyle Criswell, Tom Parish, Elzie Garner, and J. T. Brown.

Careless Milking May Be Costing Dairymen Thousands Of Dollars

Kindness will never kill a milk cow, according to R. K. Waugh, head of the dairy husbandry section of the animal industry department at N. C. State College and it might increase the farmer's

income by a surprising amount of money.

And on the other hand, lack of kindness is robbing Tar Heel dairymen of thousands of dollars annually, but since few dairymen keep milking records, they may never miss the money.

Waugh points out that it is very easy to waste a quarter-pound of milk from a single cow at each milking. In one year's time this would amount to 182 pounds lost per cow. Valued at \$6 per hundred pounds, this is \$10.92 a year, cow herd and you've lost over \$1,000.

Waugh points out that you can actually kick away this money. Cows don't like to be kicked, or otherwise mistreated. When they are, they kick back by withholding milk. They also respond to kindness. "Why, you can almost get an extra quarter of a pound of milk simply by patting a cow on the back," Waugh says.

Failure to strip the cow is another practice that is costly to the dairyman, for Bossie holds back the best until the last. That last quarter of a pound of milk is richer in butterfat than what

HOW A LOW-FRICTION FORD TRUCK ENGINE SAVES GAS

By the noted author and TV personality of "Ford Theatre" and "The Nature of Things"
DR. ROY K. MARSHALL

- "Three remarkable new Ford Truck engines can cut your gas bill as much as 14%! Here's how they work."
- "Ball of fire represents gas-and-air burning in each cylinder. This is the power to drive rear wheels."
- "But internal friction (light area) steals power from rear wheels... eats it up to move engine parts."
- FORD ENGINEERS HAVE REDUCED THE AMOUNT OF POWER LOST TO INTERNAL FRICTION UP TO 30%. THEY DO THIS BY MAKING BORE AND STROKE OF THE ENGINE NEARLY EQUAL.
- "How friction eats up power: longer nail is harder to remove, due to greater friction between wood and nail."
- "Long piston stroke in an engine means a lot of power used up, just to overcome friction between piston and cylinder."
- "But rhot piston stroke, as in the new Ford Truck engines, means less friction, less power eaten up to move cylinder."
- "Up to 20% less piston travel per road-mile in Ford Truck engines means power 'rescued' from friction."

"More power from ball of fire reaches rear wheels. Ford's new LOW-FRICTION truck engines can save you up to one gallon of gas in every seven."
