**READ GARMENT LABELS** — Look for an informative label stating that the fabric has passed washing tests. Look for these labels or tags when you shop. Check for washing test and color fast statements.  
Did you know that while most fibers are washable, washability in a finished fabric or garment depends on other factors? It depends on how the fabric has been constructed, dyed, and finished, and on the construction of the garment. Poorly made garments with skimpy seams will not stand up in washing. Heavily-trimmed garments will be difficult to handle in washing and ironing, regardless of how well the fabric might wash.  
**SUMMERTIME WASHING HINTS** — Perspiration tends to weaken all lingerie fabrics. Wash undergarments in very mild soap. Garments with lace or embroidery trimmings, dainty buttons, etc. should always be handled carefully. Squeeze carefully, roll garments in Turkish towel, and hang to dry.  
Wash foundation garments often. Never soak them. Use a small handbrush on soiled parts. Lay the garment flat on a drainboard or table and brush. Don't wring it. To remove excess moisture, roll lengthwise in a Turkish towel so that hose supporters and metal fastenings cannot cut the fabric. Dry flat on a towel, or hang over a clothesline. Press only the fabric or lace sections of a girdle or brassiere. Never dry in direct heat or sunlight — both tend to cause rubber deterioration and will shorten the life of your foundation garment.
