or after 72 days, the hogs were sold. They averaged 203 pounds each, or a total weight of 3,045 pounds, and brought 25 cents per pound. Lanier grossed \$761.25; at the time the demonstration was started the 15 shoats were valued at \$225.

Lanier's feed cost totaled \$274 for 118 bushels of corn and 1,600 pounds of mixed feed. His total investment totaled \$449.60, including the value of the pigs when the demonstration got under way. A breakdown shows that Lanier received a labor return of \$26.65 in 72 days — or about \$3.63 per day. That's good money, especially when Lanier figures he spent only an hour a day feeding the hogs.
