### and SOCIAL SECURITY

By Leola M. Byerly, Field Rep. Gastonia Social Security Office

Life expectancy today is about 21 years longer than it was in 1900, according to Mr. Joseph P. Walsh of the Gastonia Social Security Office. "This means that the average American now lives to be more than 70 years old."

He pointed out that most of us from time to time, have sat down

quietly, and taken stock of what we were doing and where we were going. Figuring up our assets and liabilities, we decided what to do for a living, whom to marry, where to live, how to bring up our children, etc. In many cases this planning is not too definite; often we more or less drift into things. As we grow older, however, it is wise to make serious and conscious plans for the future — for the years AFT-ER we elect, or are forced to retire at age 65 or later — and ranking high in such planning should be a comprehensive plan aimed at meeting personal and family economic needs during these years which science holds out to us.

If, in formulating your plan, you are fortunate enough to be able to look forward to a company pension; if, in preparation for the proverbial rainy day you have laid aside a portion of your earnings in a savings account; if wise investments have been made

from which you hope to derive income, and, if home ownership is numbered among your goals or accomplishments, you and your family can indeed look forward with much confidence to a financially secure old age.

"But, don't let your planning stop there — don't overlook what may very well prove the most important part of your entire planning program — your stake in Federal Old-Age and Survivors Insurance," Walsh advised.

In Gastonia, as in more than 500 other communities over the nation, there is a social security field office. It is YOUR office, maintained by the Social Security Administration for your convenience. Don't wait until you are over 65 and ready to retire to take advantage of its service. Find out now how the old-age and survivors insurance program fits into your plan for the future. This office serves Gaston, Cleveland and Lincoln Counties.

## A STATEMENT FROM Hazel B. Bumgardner:

It has come to my attention that certain statements are being circulated regarding me and the board of county commissioners which convey misimpressions.

One of the principal ones is: "We have an agricultural board and should have a representative of industry on the board of commissioners."

I submit to the voters the question: Is not Mr. Fitzhugh L. Rollins, the incumbent commissioner from Lawndale, an industrial representative? Mr. Rollins has spent a lifetime in the textile industry with Lawndale Cotton Mills.

I respectfully submit also that I spent 20 years of my life employed in six Kings Mountain textile plants — Pauline, Margrace, old Dilling, Mason, Bonnie, and Sadie — in virtually all the phases of operation, sweeping, spinning, doffing, and weaving. I feel this experience qualifies me, in some measure, as a so-called "industrial representative" on the county board of commissioners.

Actually, the board of commissioners, is elected to represent ALL the people, a task I have tried to do to the best of my ability for the past three years.

Your vote and support on May 29 will be greatly appreciated.

Signed: HAZEL B. BUMGARDNER
