**LETTERS TO THE EDITOR**

July 2nd, 1954

Dear Editor,

Please find a little place in your paper and let me try to thank so many wonderful people in our town who contributed to the fund for my operation. I said "try to thank" because even if I were not just two years old, I'm afraid I'd still never be able to find the words to express my appreciation. I do know one thing, all you people helping did much toward making the worry over me easier for my Mommy and Daddy. You see, financially, your help was wonderful but more than that, Mommy and Daddy knowing that so many people were interested in me, made them sure many prayers were said for me and that's always important!

Maybe all the people haven't heard that most of the nerves to my legs ended in the tumor and doctors say I'll never walk, but

oh, I'm so much more comfortable and I amaze my folks now by crawling all around and I have learned to push my legs out of my way with my hands and I can support myself with my hands and sit nearly straight up. You see, before that tumor was removed, I wasn't allowed to try to get around for there was danger of my rupturing the thing. Did you know that the amount contributed by you, Editor, and all the others, amounted to \$488.00 and a cousin of mine who is in Japan with the army sent \$20.00 and my aunt in Lynn, Mass., mentioned the operation and your generosity to her neighbors and they gave parties and raised \$100.00. Isn't that nice? My hospital bill was \$413.00 and my doctor's bill was \$280.00 so you see all my expenses except \$46.00 was taken care of by people like you.

I can't say thank you to all of them, so maybe if you can find a place for this, they'll know in a small way how much friends, even ones I don't know, mean to me.

Thank you very much,  
"Butchie" Morrison

Sir:— I feel sure you would be interested in the following article for your very fine newspaper.

Mr. C. Thomas McDaniel, a former resident of Kings Mountain, has successfully completed his first year in our School of X-Ray Technology here at Mercy Hospital, Charlotte. Beginning July 1st, Mr. McDaniel began his second year — this is his year of internship, and will graduate June 1955. Before graduating he will be eligible to take the Registry Examination; receive his diploma from Mercy Hospital, as well as the National, and State diplomas. He will then be a Registered X-Ray Technician with the title of R. T.

We have been happy to have Mr. McDaniel as a student in our school, and we feel sure he has been happy with us. As you no doubt know Mercy Hospital School of X-Ray Technology is one of the most modern and best equipped in the South. The students who enter here receive the very best training. The two years course in X-Ray Technology completes these young men and women to enter the field of X-Ray feeling sure they can make a success of what they have been trained to do.

Next year we hope to have another student from Kings Mountain enter our school. The name of this person is Mr. J. Thomas Owens. "Tommie" has already made application and been accepted.

Respectfully yours,  
Sister Mary Edward, R. S. M.— R. T.

Dear Sir:— The Board of Trustees of Cleveland County Hospitals wishes to express to you and the members of your staff our appreciation for the excellent cooperation shown us in the promotion and publicizing of the recent Hospital Bond Issue.

Passage of the bond issue now makes it possible for Cleveland County to receive the much needed additional hospital facilities.

Preliminary details for construction are now underway and it is hoped that before too long actual construction will begin.

Very truly yours,  
P. L. Yelton, Chairman  
Board of Trustees

**LET'S TALK IT OVER**

By: Grace & Selma

After the big fuss kicked up by the coffee shortage and resultant high prices, let's investigate the history of the little beans cultivated by our neighbors to the south.

A fourteenth century Arabian, named Kaldi, is said to have taken so strongly to coffee breaks that they neglected business matters to the extent that the Governor of Mecca banned public coffee houses as "places of corruption." Coffee made its way to England in the fifteenth century and by 1668 it was introduced on these shores.

If you are lukewarm toward our way of brewing the stuff, try methods used in other parts of the world. The French, for example, lean toward cafe au lait, an eye-opener composed of strong black coffee and scalded milk, poured half-and-half from two containers. Turkish coffee is brewed to the consistency of Mississippi River bottom mud. The Brazilians fill a demitasse with granulated sugar and pour strong coffee over it, a practice designed to end the shortage in a hurry if adopted here.

By the way, you'll never be lukewarm toward the service and quality which everyone in these parts associates with ALLEN'S FLOWER SHOP, 624 East King Street. We specialize in suitable floral arrangements for every and any occasion. Remember the name — ALLEN'S FLOWER SHOP. (adv.)
