"DECORATING TIPS" By GENE TIMMS WHAT DO CUSTOMERS WANT?

A national survey company recently interviewed more than one thousand women from all over the United States and asked them what they like, what they want and what they hope to find when they walk into a furniture store.
 We thought you'd be interested in these women's answers. Here are the results:
 1. Most women want to see a large, well-displayed selection of attractive furniture.
 2. They want to be served by salespeople who are helpful and courteous.
 3. They want to deal with a merchant who has earned a reputation for fair dealing and good service.
 4. They would like to find a good selection of the advertised items and to find them exactly as advertised and illustrated.
 5. They want to be served by neat looking salespeople in a clean, neat looking store.
 6. They like to see furniture in complete room settings and co-related groupings, shown with all of the proper accessories wherever possible.
 7. They want to deal with a salesman who is advising them honestly and truthfully.
 Incidentally, I believe you will find all these qualities in our store. We invite you to come in and browse around with no obligation — and see for yourself.
