TIMMS

A recent survey shows that most women want a separate living room and dining room in their homes and apartments instead of the combination living-dining area.
Blue is becoming a leading color in upholstered furniture. Deep, dark, rich blues, almost royal blues are most beautiful and popular.
A carpet industry study of wall-to-wall carpet vs. rugs shows that year after year wall-to-wall carpet is increasing in popularity.
In many new homes the kitchen is becoming a family room again as it was years ago with facilities for informal dining and entertaining.
Wall ornaments, pictures, sculpture, decorative accessories, floral decoration for walls or floors are more popular than ever.
Living room groups using solid color sofas and bright floral matching chairs are offered as co-related groupings by both leading manufacturers and retailers.
And to see some other furniture ideas and trends and to see a wonderful display of furniture, we invite you to stop in.
