DECORATING TIPS By GENE TIMMS

HERE ARE SOLUTIONS TO BEDROOM DECORATING PROBLEMS

One of the most difficult rooms to decorate effectively is the bedroom.

But there are a variety of simple decorating devices that can be used to fit your furniture into your bedroom with maximum usefulness and eye appeal. The National Assn. of Bedding Manufacturers has prepared some ideas which we're happy to pass along to you.

For instance, you can blend your bed beautifully into the background of the room. This could mean a patterned spread matched to wall-paper or fabric on the headboard wall; or use a solid spread in a shade just a bit lighter than the carpet. Exciting effects, too, can be created by applying the same pattern or stripe to spread, walls and draperies.

Another idea to get a decorator effect in your bedroom is to eliminate the headboard of the bed. Distinctive, imaginative substitutes can be found. Oversize bolster pillows; a low-hung grouping of colorful framed pictures; a dramatic panel of wallpaper—any of these might be used.

For the latest in Bedroom Ideas, come by our store, and remember, we will not be undersold, whether cash or terms, you get the largest discount from US.
