James O. Parrish, 26, Clayton, stop light violation, half costs.

Joseph B. Morris, 21, Ellenboro, speeding 50 in 35 zone, half costs.

Eliminating Costly Rats Takes Planning

Each year rats cause an estimated one billion dollars in damage to food, property, humans and livestock in the United States.

Research indicates that the damage caused by the rodents is equal to the total production of more than 100,000 average farms.

Each rat costs about \$20 or more per year to board, according to Vernon Cunningham, State Supervisor of the Division of Wildlife Service, U. S. Fish and Wildlife Service at North Carolina State University. Rats cause the damages by destroying property, contaminating food and carrying diseases.

As an example of the damage done by rats, Cunningham cites one rat eating about one-third as much feed as a laying hen and contaminating ten times as much feed as it eats.

Rats are also threats to health. Cunningham says they are known to transmit 35 diseases to men and animals. Rats also carry 18 kinds of lice, fleas, ticks and mites.

Insurance companies blame rodents for extensive damage. They estimate that 25 per cent of fires of undetermined origin are caused by rats.

A year-round approach should be utilized in controlling rats and mice. Cunningham says one pair of rats can breed five times and produce 50 young per year. Mice are even more prolific. Reproduction occurs all during the year in North Carolina.

Food, water and shelter are essential for rats to live and reproduce. These essentials can be used to eliminate infestations of rats and mice, Cunningham added.

Tall weeds or grass and piles of trash, lumber or brush serve as breeding places for rats and mice. These sources of rat harborage should be eliminated and followed with good day-to-day housekeeping, Cunningham pointed out.

Buildings and feed bins should be rat-proof. Concrete, hardwood cloth or sheet metal can be used to close cracks, breaks and spaces around pipes, vents and other openings.

Most ready-to-use or concentrated anticoagulant baits will give good control with proper use, according to Cunningham. "Placing bait near main traveled runways and near centers of activity which mark the living quarters of rats and mice is the most important factor."

Farmers should not conduct clean-up campaigns prior to eliminating rat infestations. Cunningham said this merely causes rats to find new hiding places and to establish new feeding habits which would make the task of proper bait placement more difficult.

Insurance Benefits Listed

Few employees coming under new group health insurance programs written by insurance companies pay the full cost of their protection, the Health Insurance Institute said today.

The Institute was reporting on its sixth annual survey, soon to be published, "Group Health Insurance Policies Issued in 1965." It showed that in 3,162 contracts examined—which protected 234,717 employees and 586,790 dependents—only 2.4 per cent of the employees paid the full cost of their protection.

The largest proportion of employees in the sampling—50.1 per cent—had their protection paid for entirely by the employer, while 47.5 per cent shared the cost, in some proportion, with the boss.

Forty-three companies contributed data to the Institute's survey. These firms accounted for

over 78 per cent of the group health insurance written by companies in 1964.

The Institute said that since it began its survey in 1960, the trend has been for a greater proportion of the employees to have their group health insurance paid for in full by the employer. In 1960, 33.6 per cent did not contribute toward their insurance; in 1961, it was 39.7 per cent; 1962, 41.2 per cent; 1963, 45.6 per cent; and in 1964, 47.5 per cent.

The provisions in group health insurance programs are decided upon by employers - or through management - union negotiations, the Institute said.

The Institute said that accord-

ing to its survey, group health insurance plans which protected working groups of 500 or more were likely to have the employer pay the entire cost than in groups of fewer workers.

In 1964, group health insurance programs provided by insurance companies protected a total of 64,506,000 persons.

CAN'T LEAVE HOME?

Order Sickroom Needs by Phone

- Call us for speedy delivery to your home or sickroom needs that make the patient more comfortable, aid in recovery, and ease the work of the "home nurse."

STOPPING the CLOCK Doesn't Save Time

- And it is just as silly to try to save money by not having a prescription filled!
- Today's medicines cure so swiftly that medical bills are lower... costly hospitalization is often prevented... convalescence is shortened... and income loss is sharply reduced because you return to work sooner.
- Truly, prescribed medicine is the biggest bargain you can buy. The most costly prescription could be the one you don't have filled.

Mrs. Kendrick's Rites Conducted

BOILING SPRINGS — Mrs. M. Nevette Kendrick, 79, died at 6:30 p.m. Thursday at Royster Memorial Hospital after a lengthy illness.

She was the widow of a former Kings Mountain citizen and sister-in-law of Mrs. J. E. Lipford and Miss Margaret Kendrick, of Kings Mountain.

She was the former Maude Hamrick of Boiling Springs, daughter of D. J. and Elizabeth Nickolson Hamrick.

Survivors include two sons, Lynwood Kendrick of Charlotte, S. C., and Joe Kendrick of Route 3, Shelby; one daughter, Mrs. M. G. Kokoska of Charlotte; and four grandchildren.

Funeral services were conducted at 11 a.m. Saturday at Pleasant Ridge Baptist Church with the Rev. Paul Stamey officiating.
