Telephone Talk
 By R. B. MOORE

WANT TO MAKE THE VERY MOST OF TELEPHONE SPEED AND CONVENIENCE? TRY FOLLOWING THESE FOUR EASY STEPS . . .

Listen for the dial tone . . . if you start to dial too soon after picking up the receiver, the full number may not register with dialing equipment. You'll either get a wrong number, or the call won't go through. Remember, the dial tone is your signal that the telephone is ready to receive your call.

Refer to the number while you dial . . . especially if it's an unfamiliar one. Memory can play strange tricks, so it's a good idea to have the number in front of you as you dial, either in the directory or in your personal number list.

Let the dial return at its own speed . . . if you try to hurry the dial back faster than its normal speed, all the numbers may not register with telephone dialing equipment!

Speak directly into the transmitter . . . the phone is designed to pick up the voice of the caller, and eliminate as much background noise as possible. This means your voice is clearest and most easily understood when you speak directly into the phone.

WITH THE SUMMER SEASON UPON US WE ALL AT SOME TIME OR ANOTHER WILL PROBABLY VISIT OUR BEAUTIFUL MOUNTAINS. LET'S TRY AND REMEMBER THAT FOREST FIRES WILL DESTROY THIS WONDERFUL SCENERY THAT NATURE HAS PLACED HERE FOR US TO ENJOY. SO DO YOUR PART AND MAKE SURE THAT YOU ARE NOT RESPONSIBLE FOR STARTING A FOREST FIRE.
