

(Continued From Page Three)  
 Ingram moved his 1955 Chevy into the lead with the green flag but gave way to Lowe on the fourth lap. Ingram led the race once more before pitting for gas on a caution flag. Lowe then moved out to a big margin over the second place car and stretched it to three quarters of a lap by the end of the race.

Tommy Houston of Conover gave Ford its best finish, in fourth place; Richard Brown of Claremont ran fifth; Allen Rankin, Troutman, sixth; Doug Chester, Lenoir seventh; Joe Thurman, Rocky Mount, Va., eighth; Harry Gant, Taylorsville, ninth, and Irvin Killian, Hickory, tenth.

A consolation race for drivers failing to make the field of the fastest 30 cars was won by Jimmy Cline of Statesville.

Running time for the "Scout-O-Rama 250" was one hour, 27 minutes and 47 seconds.

This coming Saturday the race card includes a 50-lap double point race for Hobby cars, a 50-lap feature of Sportsman and events for the Rookie performers.

(Continued From Page 3)  
 rell Moody's bases-loaded triple gave State a 4-2 win over Clemson.

Big innings also featured State's play in 1968 with the Pack scoring five runs or better on seven different occasions. So Esposito's running Wolfpack can't be counted on until the final out.

(Continued From Page Three)  
 wrecked after leading in the early part of the race.

Next Saturday night the Shelby Speedway will host another special 60-lap main event for late-model sportsmen. With first place money at \$600 some of the top drivers in Western North Carolina are expected to go after the checkered flag. Drivers will be able to use the expanded cubic inch motors and will challenge Humphries, Blanton, and Gossett who will use the smaller motors, but who proved to be quite competitive Saturday.

**Mary Helen Goforth In Student Post**

BOONE—Mary Helen Goforth, daughter of Charles E. Goforth of Route 1, Kings Mountain, has been elected "secretary" of the 1969 Student Government Association at Appalachian State University.

Miss Goforth, a graduate of Kings Mountain High School and a rising senior at the University, will be installed Tuesday night at the organization's annual banquet.

**Short-Bedded For Guests? Here's Tips**

RALEIGH — If you've been caught "short bedded" when a guest arrived for a visit, perhaps you need to combine several functions into one piece of furniture, says Mrs. Lillie Little, extension housing and house furnishings specialist, North Carolina State University.

Dual-sleep units really have a triple role to play in the home, Mrs. Little adds. They offer both seating and sleeping comfort and have sufficient good looks to appear at home either in a bedroom or a living room.

Here are hints from the specialist about what to look for in this type of furniture:

Both eye appeal and comfort qualities have been advanced through the development of new fixtures and mechanisms for dual-sleep furniture. Such new mechanisms permit a floating action of the mattress for superior sleeping comfort, permit the user to sleep at night height, rather than close to the floor, and permit many dual-sleep units to be slip covered.

One of the basic things a consumer must consider when selecting a dual-sleep unit is whether or not the piece will be used every night or just occasionally. A unit with a better mattress will be needed if the furniture will have constant use.

The three main types of seating-sleeping units made by the upholstered furniture industry are sofa beds, sofa sleepers, and day beds.

The sofa bed has no separate mattress. When the sofa front is lifted, the back drops down to form a flat surface. Both seat and back are usually of smooth, tight construction over springs which form a comfortable sleeping surface. A bedding box under the sofa seat provides handy storage for linens.

A full-size mattress is concealed under the cushions of the sofa sleeper. When cushions are removed and the seat lifted up and out, a mattress stretches forth.

The day bed is akin to both sofas and sleepers. Like sofas, they do not open into beds, but are stationary. Like sleepers, their seat cushions are often called mattresses, but are upholstered to match the rest of the piece. It may have arms ends, but usually a day bed does not have a stationary back.

The Veterans Administration is the third largest agency in terms of budget and personnel. Defense is first in both; Health, Education and Welfare is second in budget, and Post Office is second in personnel.

**GARDEN TIME**

Don't neglect your house plants during the summer months because they provide so much color and pleasure to family living during the wintertime.

If you have rooted cuttings to pot try this mixture: 3 parts of good loam soil; 2 parts of peat moss; and 1 part of coarse sand, all of these by volume. To this mixture add 1 cupful of 20 per cent superphosphate to each bushel of prepared soil. Bone meal may be substituted for the superphosphate.

I suggested peat moss because it is readily available and a good clean source of organic matter. You may substitute leaf mold or well decomposed compost for the peat.

If the garden loam is heavy or clay-like, you should use two parts of sand. If the garden loam is light or sandy, the sand may be omitted.

If a good soil mixture is used at potting time, the plants usually do not need fertilizer for two or three months. However, well established and actively growing plants may need a small amount of fertilizer every five or six weeks. Do not fertilize resting plants.

The best method to apply fertilizer to house plants is in liquid form. If a soluble fertilizer is used be sure to follow the manufacturer's instruction. If a dry garden-type fertilizer is used, such as an 8-8-8, dissolve one teaspoonful in one quart of warm water. Stir well and let stand over night before applying. Use enough of the solution around each established plant to wet the soil well.
