How necessary is nutrition in maintaining good health? Dr. W. H. Sebrill, Dir. of Inst. of Nutrition Sciences at Columbia U. states: "Today nutrition is finally beginning to be recognized as an important factor in the treatment of and convalescence from almost every disease." Dr. Robt. E. Shank of Washington U. School of Medicine wrote: "There is probably no other single factor so important to the achievement and maintenance of health as nutrition." Anyone interested in his good health should surely follow the nutrition advice in books and pamphlets by trained nutritionists, available in medical and U.S. Govt. publications. The body obviously must have the essential nutrients in sufficient quantity if it is to maintain and repair itself properly.

Five Common Errors Taxpayers Make

GREENSBORO, N. C. — J. E. Wall, District Director of IRS, today listed the five most common errors taxpayers make in preparing their Federal tax returns:

1. Errors in arithmetic
2. Failure to sign the return
3. Failure to enter Social Security Number

4. Incorrect address

5. Failure to attach Form W-2 for each job

Wall urges all taxpayers and tax practitioners to check and double check all returns for accuracy before mailing them to the Service Center in Chamblee, Georgia, this year.
