The McGuires Wrestle In KM On Friday Night

You've probably seen them on the back cover of the Guiness Book of World Records or in one of Ripley's Believe It Or Not

If not, Benny and Billy McGuire, the world's largest twins, will be in Kings Mountain Friday night to take part in an IWA wrestling card at the ville, Billy, 747 pounds, and

community center. Action begins at 8:30 p. m. The McGuires, with a

combined weight of 1,474 pounds, are Hendersonville natives and have spent the last 10 years touring the world for wrestling matches and

personal appearances.
Now residents of Nash-

their first tour through their native North Carolina and are packing the arenas

at each stop.
"Really," said Benny,
"we haven't had time to come back home. We've fust returned from a tour of Japan, and we've worn out two passport books since we started wrestling

Wrestling fans, they said, are basically the same all over the world.
"Except for Japan," said
Billy. "The fans are quiet. When the match is over, if they enjoyed it, they clap their hands."

The McGuires measure 84 inches around their waists and it takes five yards of cloth to make a shirt and six yards to make apair of pants. Needless to say, getting in and out of automobiles, airplanes, and the like, is a task. But, if you think the McGuires are miserable, forget it. "Our size has enabled us

to do a lot of things we otherwise might not have done," they say. "Wrestling provides a steady income, and we receive a percentage from the Guiness Book of World Records and Ripley's Believe It Or Not.

The McGuires, who don't drink or smoke, were average size youngsters until the age of 10 when they came down with the German measles.

"It messed up our pituitary glands," said Benny. "We almost died and after that we started gaining weight.

"We tried to lose once," he went on. "We went to Duke Hospital and stayed six months. The doctors tried everything but couldn't do any good."

They eat two meals a day, and take between an hour and an hour and a half to eat.

For breakfast, which usually runs from 9 a. m. until about 10:30, each McGuire eats one dozen eggs, four pounds of bacon, a loaf of toast and one-half gallon of orange juice. For dinner, which is éaten at night after a full day of work, they each eat four 12-ounce steaks, seven baked potatoes, a large bowl of salad and one-half gallon of tea.

Come to think of it. The McGuire twins have to make a lot of money . . . to fill their appetites.
