

GIVING CONSENT — Kings Mountain citizens are shown here Tuesday signing consent forms before taking their swine flu shots at the community center. Over 200 persons took the vaccination on the last scheduled visit here.

At Community Center Over 200 Receive Swine Flu Vaccine

Are you allergic to eggs? County health officials asked that question over 200 times Tuesday between 9 a. m. and 1 p. m. as a steady stream of Kings Mountain citizens filed into the community center for swine flu vaccinations. Health officials explained that those allergic

to eggs could not take the shots as egg was an important process in the vaccine.

Tuesday's free vaccinations were the last scheduled for Kings Mountain but persons who did not receive theirs Tuesday may still do so by going to the county health department in Shelby.

The department gives the free vaccine five days each week, from 8:30 a. m. until 4:45 p. m. at the department at 815 Grover Street.

There are two types of vaccines available.

For persons in good health and between the ages of 18 and 59 there is the swine flu vaccine.

The second type is a combination of swine flu and A Victorian flu. These inoculations are for persons who suffer chronic health problems or who are 60 years of age or older.

Health department officials state inoculation against influenza is very important because everyone is subject to contracting the disease. Health officials state that the strains of flu alter from one season to the next and immunity to the type of virus a person has developed during the year may not be effective at fighting off the altered strains the next year.
