What Are The Odds?

The odds are that 3 out of every 4 people over 65 will develop cataract, but of those who undergo surgery to correct this leading cause of blindness, 95 percent will recover their sight.

Children don't usually complain about a vision problem because they don't know how well they should see. But the odds are one in 20 that a preschool child has some kind of eye disorder.

For a free booklet about saving sight, write your state Prevent Blindness Society, or the National Society to Prevent Blindness, 79 Madison Avenue, New York, N.Y. 10016.
