## Evinrude VRO Oil Injection: An Easier Way To Get The Right Mix For Every Speed

The 1986 Evinrude 70 Looper with VRO

### NOW WITH A LOW-OIL WARNING SYSTEM.

Evinrude VRO® Variable Ratio Oil injection automatically delivers a precise fuel mix that's right for every operating speed. From approximately 150:1 at low idle to 50:1 at top end. We invented the first system for exclusive marine use. This year it's even better. Now VRO has a new no-oil warning system that sounds an alarm. So even if your oil pump fails, your engine is protected.

Get the VRO advantage on Evinrude® outboards from the 40 electric to the 3.6 XP V-8. Now available at:
