

PLAN FOR DIAMOND JUBILEE CELEBRATION OF WAMAN'S BAPTIST HOME AND FOREIGN MISSION CONVENTION—Pictured are: left to right, D. H. Keck, Shaw University secretary; Mrs. Mildred McTear, assistant professor of religious education; Dr. William B. Strassner, President of Shaw; Dr. Ellen S. Alston, executive secretary of the W.B.H. and F.M.C. of N.C.; Dr. Grady D. Davis, dean of the School of Religion and Mrs. Thelma M. Keck, director of publicity. Plans are being mapped out for the various phases of the Seventy-fifth Annual Session set for August 11-14 on the campus.

A&T Science Institute Was "Tough, But Interesting"

GREENSBORO — Tough, but interesting and worthwhile' is the manner in which the participants in the recent A&T College Summer Institute for high school Science Teachers described their experiences in the program.

They made such statements at dinner meeting held on last Thursday evening, which marked the close of the Institute, ending a six weeks concentrated course sponsored at A&T College by the National Science Foundation.

The teachers had highest

praise for the food, accommodations, recreational opportunities and the idea, but they complained that the classroom, laboratory and home work were too much like real work. All agreed that they return to their own classrooms the better teachers.

The Institute, headed by Dr. Gerald A. Edwards, chairman of the A&T Chemistry Department, boasted an outstanding staff of faculty and visiting lecturers. Among them were: Dr. Artis P. Graves, chairman, Biology Department; Dr. George C. Royal, professor of Biology and James Pendergrast, associate professor of Chemistry, currently a National Science Founda-

tion Faculty Fellow at Pennsylvania State University, all of A&T College.

Dr. Emil Witschi, world famous Zoologist, Professor of Zoology at University of Iowa; Dr. Louis Cason, chemist, Minnesota Mining and Manufacturing Company, St. Paul, Minn.; Dr. William E. Warner, Biology, Blackburn College, Carleburg, Ill.; Dr. E. G. Purdom, physicist, Guilford College; Dr. Allyn J. Waterman, biology, Williams College, Williamstown, Mass.; Dr. Clyde R. Dillard, chemistry, Morgan State College; Dr. Samuel P. George, chemistry, Fisk University and Dr. George Goldfinger, Research Chemist, U. S. Rubber Co., Naugatuck, Conn.

Open To Negroes:

CAREER OPPORTUNITIES

TEACHERS FOR HANDICAPPED

There is an urgent need for teachers of exceptional and handicapped children. Especially is this true for the South, and the significant part of all is that the South is doing very little about these teachers.

With the present teacher-training facilities in the South, it will take the South another 20 years to train an ample supply of speech correctionists. The South trains very few teachers of the blind and deaf, yet it

needs an estimated 60 teachers in this field annually.

The South needs some 500 additional teachers of sight-saving classes, yet is doing practically nothing about training these teachers.

The southern states need about 6,000 additional teachers of orthopedically children.

At the rate we are training teachers for the mentally retarded, it would require at least 15 years to reach a reasonable goal of 4,300 additional teachers.

By 1960, the South with almost 12,600,000 children, aged 6-17—and about one and a quarter million

handicapped children—will need thousands of additional special teachers than it now needs. Continuous study and planning can lead to effective state and regional action in meeting the needs of our handicapped children. Why not, and you can't go wrong, inquire about the opportunities for training as special teachers in the North and far-West?

Here's a Tip...

CALL CP&L

Don't get us wrong—there is plenty of electricity. However, the quality of service delivered to appliances in your home depends on two things. First, the adequacy of your own wiring—second, adequacy of the Company's equipment serving your neighborhood.

You have complete control over the situation in your home because you know exactly when you plan to add an air conditioner, electric clothes dryer, or some other major current consuming device. You can help us insure high quality service to your home by telling us when you plan to add major appliances.

Don't deprive yourself of the comfort of air conditioning or the convenience of other electrical equipment so necessary to modern living. Just be sure you get the best possible service by calling us before adding those major appliances. Chances are our facilities are adequate. If not, we will make them so.

CAROLINA POWER & LIGHT COMPANY

Ex Prexy Of Tuskegee To Be Cited

WASHINGTON, D. C. — Dr. F. D. Patterson, former president of Tuskegee Institute, and now head of the Phelps-Stokes Fund, will be one of four to receive awards at the 12th Annual Regional 4-H Club Camp, August 9-17 at Howard University.

The other three to be honored are: Dr. M. Lafayette Harris, president of Philander Smith College, Little Rock, Ark.; Walter S. Scott, president of Guaranty Life and Health Insurance Company, Savannah, Ga.; and J. H. Wheeler, president of Mechanics and Farmers Bank, Durham, N. C.

These educators and businessmen are to be honored by the National 350,000 colored 4-Hers for their encouragement and aid to the boys and girls in the carrying out of club projects and in developing effective State-wide 4-H programs.

Regional 4-H plaques will be presented to them on the afternoon of August 16 in the Engineering and Architecture Building where most of the camp sessions will be held on Howard's campus. Assistant Secretary of Agriculture Ervin L. Peterson will be the awards speaker.

This will be one of the major events of the encampment week during which the 128 club delegates from the Southern region will take part in a number of activities. Among these: visits to the White House, Capitol, Mount Vernon, and the U. S. Department of Agriculture's research center at Beltsville, Md. and a discussion of career opportunities led by Miss Roberta Church and Samuel B. Fenley of the Department of Labor and Sterling Tucker of the Washington Urban League.

Also the 4-Hers will hear addresses by Dr. Wills B. Plavins, president of Bennett College, Greensboro, N. C.; Federal Extension Administrator C. M. Ferguson; and National 4-H Director Edward W. Aiton.

Cleared Of Wife's Murder, Faces A Similar Charge

VICKSBURG, Miss. (AP) — Isaac King who makes his living selling hot tamales was cleared last week of murdering his wife, but he was immediately charged with murdering his wife's male companion.

Police said King shot and killed his wife and Benjamin Harrison, May 17, with a single blast of a shotgun.

A jury found King innocent of murdering his wife after the defense said she was unfaithful to him but the state stepped in and charged King with the murder of Harrison.
