## Realtor Threatens "Spite Sale" Of His Property To Negroes

LIMA, Ohio — (AP) — A real estate agent threatened last week to sell his home to Negro families because of opposition to his plans to build a service station on the premises.

Claton D. Bucher, white, made the threats when neighbors of the area protested in City Council his request for a zoning change.

Councilman Frank J. Klein told Bucher:

"This is the most callous attempt I have ever seen to blackmail this Council and the neighbors who oppose your petition."

"If Council approves our petition, it will be open to the claim that we acted to deny Negroes the right to buy this property. If we

reject the petition, we could be charged with yielding to the opposite pressure."

Council tabled the issue indefinitely.

**HOW "PUBLIC POWER" ADDS TO YOUR TAX BURDEN**

One of the most unnecessary government spending programs you could imagine is adding to your tax load every year. It's the multi-billion-dollar spending for federal "public power."

About \$3,500,000,000 from you and other taxpayers has already gone for federal government electric power systems. And \$10,000,000,000 more is being proposed.

Yet it's unnecessary to go on spending more of your tax money to put the federal government farther into the electric business. Independent electric companies like yours are ready and able to supply all the electricity people will need—without depending on your taxes.

Then why does this needless tax spending continue? Only because most people don't know about it. So spread the word among your friends and neighbors. As soon as enough people realize how "public power" adds to their tax burden, they'll put a stop to it.

WHEN "PUBLIC POWER" WINS—YOU LOSE! Every time another federal "public power" proposal goes through Congress, you are taxed to pay the bill.
