

RECENTLY DIAGNOSED WITH HIV AND LOOKING FOR OPTIONS?

Do you need to start an HIV treatment?

Find out if you qualify for a clinical research study evaluating an investigational combination medication for HIV.

For more information contact:

Rosedale Infectious Diseases, PLLC
Steven Haynes, Research Coordinator

shaynes@rosedaleid.com

A clinical research study is looking for adult volunteers to study investigational combination medication for people with HIV. Doctors are studying it to see if it may be an effective and convenient option for people with HIV. Those who qualify will take study medication for at least 96 weeks (almost 2 years), and will receive all study-related care at no cost. Study medication will either be the investigational medication or an approved medication for HIV.

- + Must be at least 18 years of age
- + Must be diagnosed with HIV
- + Must be antiretroviral treatment naïve
