Facts Worth Knowing.

Guanos are of two kinds-those in which Ammonia predominates, as in Peruvian, ny, Nashvilles (under cover) enclosing and those in which the Phosphates of Lime, fifteen cents in cash or Confederate stamps &c .. predominate, as in Sombrero, and securely. United States government enve- others. Both experience and theory esopes or stamps are of no use to us, so do tablish the fact, that Ammonia and Phosnot send them. The rate above given is phate of Lime are essential idgredients for For letters not exceeding 1 ounce in weight, a general fertilizer, and consequently, for letters weighing over half an ounce will general purposes, a proper mixture in the have to contain sufficient money to pay two is recommended. Whilst the Peruvian and other ammoniated Guanos are mere stimulants or quickeners of the soil, the Sombroro Guano is a permanent fertlizer, but

of slower action and less perceptible effect the first year, unless aided by some stimulant. Hence the great importance of combining the two in proper proportions, which, if done, makes the best, most conbenient and economical fertilizer known .-Assuming the cost of Peruvian Guano at \$60, and Somrbero at \$30 per ton, and with one quarter of the former and threequarters of the latter, (which proportions are recommended by experienced farmers,) it gives, at a cost of \$37,50 per ton; a more valuable as a remedial agent, in the fertilizer far more valuable and permanent than the Peruvian alone. The agriculturist need only be reminded of the nature of the two predominating ingredients in these different species of Guano to enable him to in this State, if the proper labor can be before the American public. It is believed understand the proper mode of its applicais liable to evaporate or rise, Phosphaof Lime (in the Sombrero) is heavy; and to sink below the reach of the roots of moved by it, is not liable to return, as plants; therefore it should be either de-A single dose of this medicine, which or used as a top dressing, in the propor-Guanos are combined and used as a top dressing, the spring is the best fime, when the crop is assiming its sustenance and rigor, as at that time the benefit of the Ammonia is less likely to be lost than if used in the fall or early winter.
