

the many-sided study of electrical engineering; and the same is true in the fields of mechanics and mechanical draughting, civil engineering, industrial chemistry, and a large number of related fields. Couple this with the fact that we have a number of highly trained college and university men at the head of these and other departments, and it is easy to see what magnificent opportunities exist here in Badin for young men who are ambitious to excel in technical occupations.

Our vocational night classes at the School are now making these advantages available. Here is an opportunity that no young man of Badin should neglect.

The Human Bodie

The bodie is divided into four main sections, namely: the hed, chist, stummick, and limbs, if any.

The hed is at the opposite end of the bodie from the feet, even though you stand on it. It is full of notions, teeth, hare, brains, etc. The hed is one of the most important sections of the bodie; but some are more ornimental than others.

The eers that decorate the sides of the hed serve as windshields, preventing drafts on the back of the nek. They also keep your hat from sliding down too far, and prevent the feller behind you from seeing the show.

The "lamps" cause you to wear specks as you look at the effects of the wind. They are two in number, if one has not gone out. Above them is the eyebrows. Sometimes one is misplaced though, and grows wild on the upper lip.

The nose is an important part of the hed, dividing the faze into two hemispheres. It provides a bridge for the specks to rest on.

The mowth is used to eat, drink, and wissel, and to coff with if you ketch the flu.

The chist contains the bellowses, giving off compressed air during emergency. Other arganisms are found in this siction.

The stummick contains the vitals and vowels, a, e, i, o, u, and sometimes w and y. And it furnishes a place, too, around wich to fasten a belt or to wear a pretty vest.

The limbs, if any, keep the rest of the bodie off the damp ground, making two tracks instead of one.

The feet are fertil fields for the production of corn crops—varieties, hard and soft. The yield varies directly with the season's fassions.

Baptist Briefs

We are all "on edge" to see the work going forward on the new church building, but building material is scarce, and all we can do is to go as rapidly as possible and "let patience have her perfect work." But we are building a great structure, pleasing to God and men. We must not expect it to be reared up in a moment. Great things are not built that way.

Material is being gathered to complete the exterior in order that the scaffolding may be cleared away. Then we may see it in all its beauty, and the most skeptical will be convinced that we have one of the most beautiful church buildings in this part of the country.

There are a number of Baptists in our city who have been here for some time, and have not become members with us. Come in with us. There is in all the land no place to make your life count for more for Him who gave His life for you, than in the Badin Baptist Church. Our doors are open for you to come either by letter or on statement.

The "Building Badin Bigger" program that is on for the spring and summer will doubtless bring a goodly number of Baptists to our city. Come on, brethren, and become "citizens of no mean city." A cordial welcome awaits you at the First Baptist Church and in the hearts of its members.

Presbyterian Notes

Messrs. A. K. Martin, J. R. Manley, R. A. Sappenfield, and Rev. and Mrs. T. G. Tate represented the church at a Stewardship Conference, at Norwood, N. C., March 14.

Recently Messrs. H. B. Rhea, C. F. Rogers, W. H. Russell, and R. A. Sappenfield were ordained and installed deacons of the church.

Interesting meetings of the Ladies' Aid Society were held recently, at the homes of Mrs. F. F. Manley and Mrs. W. S. Spencer.

The new church will be ready for use by June 1, we hope. Let us look forward joyfully to our first service.

Services will be held in School House during April, at 11 a. m. and 7.30 p. m. Sunday School at 10.00 a. m.

Stewart—Johnson

Friends and associates are still congratulating M. B. Stewart, and wishing him and his bride all kinds of good luck, long life, and happiness. Mr. and Mrs. Stewart, who was Miss Evelyn Johnson, of Jamestown, N. C., are now at home at No. 31 Willow Street, and their friends will be welcomed there.

What Money Can Buy

A heart to love you till you die,
That's a thing that money can buy.

A look of love from a loving eye,
That's a thing that money can buy.

A tongue that never will tell a lie,
That's a thing that money can buy.

An ear to hear when "Come" you cry,
That's a thing that money can buy.

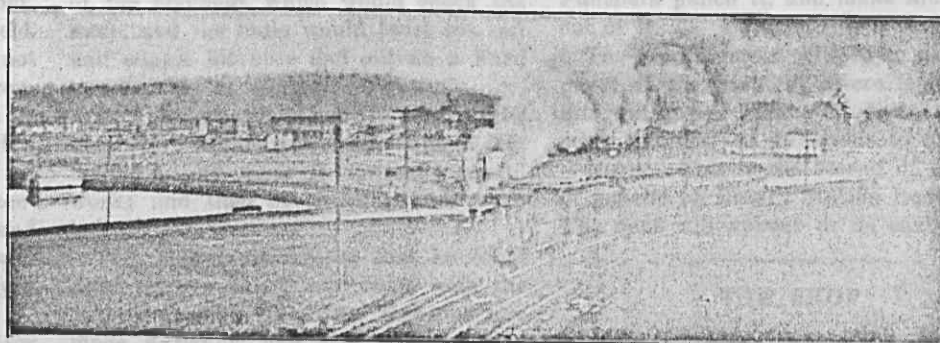

Ear and tongue and heart and eye,
These are things that money can buy;

Wherever dogs are bought and sold,
There are things that money can buy!

—Life

Mr. W. F. Gambrel has returned from a two weeks' vacation with relatives and friends in Griers, S. C. Mrs. Gambrel is undergoing treatment at the Griers Hospital.

Mr. Harvey Allen, wife, and two children are all sick with the "flu."
