

Richmond, Va.

I thank you for the copies of the BADIN BULLETIN, and for your letter calling attention to the progress, method, and splendid spirit of the Tallassee Power Company in dealing with its colored employees.

Very sincerely yours

JACKSON DAVIS

General Field Agent General Education Board
404 State Street, Bristol, Tenn.—Va.

I thank you for the opportunity to visit BADIN, and see the work of the Tallassee Power Company. To my human way of thinking, the Tallassee Power Company offers great opportunities to the working people of my race. This Company offers good wages to the colored people, and the best educational advantages that can be given in any place, the schools being taught by an excellent faculty of teachers, with Prof. E. G. Harris as principal.

Another great opportunity for our colored people at this Plant is that the Company offers to sell them good homes on easy installment plans. The recreation center for the

colored people at this great plant is another advantage in favor of their going to BADIN.

I want to urge all colored people who are seeking work to go to BADIN, N. C.; where the Tallassee Power Company offers them great opportunities for development along all lines of civic life.

Most respectfully

R. E. CLAY

"Southland's Negro Orator"
President Negro Business League
Greensboro, N. C.

Your attitude, as I see it in the first place, is to give the Negro a square deal, as you feel any other people should have. In the second place, you expect as a result more efficient work, which means greater productivity in your plant. While the idea of producing aluminum may be the chief end in mind, yet the means by which you are doing it may serve as a very valuable demonstration to our country in the so-called and much discussed race problem.
