Church Calendar—Revival Begins

The people of the Carey Community are looking forward to the first week in July, when an old friend and pastor, Rev. George Tunstall of High Point, N. C. will help the pastor of the church, Rev. John F. Mitchiner in holding a revival.

The services will begin on the first Sunday afternoon in July and last the entire week. The public is cordially invited to attend.

Sunday School

Sunday School met at 10:30 o'clock, at Carey's Baptist Church Sunday July 14, 1931, with Supt. B. D. Adcock in charge of the service.

Preaching services are held by the Pastor Rev. John F. Mitchiner the first Sunday afternoon at 3:00 o'clock and the third Sunday morning at 11:00 o'clock. The public is cordially invited to attend these services.

B. Y. P. U. Service

The B. Y. P. U. Service of Carey's Baptist Church met Sunday June 14, at 7:00 o'clock for its usual service. The group captain in charge was Miss Mattie Adcock, the topic for discussion was "The Bethany Home."

Arrangements were made for a Senior B. Y. P. U. Study Course to be held this week. Miss Mary Currin will conduct the course. The book to be studied is the "Senior B. Y. P. U. Administration Book."

The public is cordially invited to attend the Sunday night services of the Union.

COKESBURY NEWS

By VERGIE HICKS

The Vance County Sunday School Convention will be held Thursday June 25, at Cokesbury M. E. Church with an all day service and dinner on the grounds.

Last year it was held at Carey's Baptist church and an interesting program and a bountiful dinner was thoroughly enjoyed. This year's Convention promises to prove even better, and a full attendance from each church in the county is expected. There will be a Prayer Meeting Service conducted by the Pastor, Rev. P. D. Woodall at Cokesbury M. E. church Wednesday P. M. June 17, at 6:45 o'clock. The public is cordially invited.

Mrs. J. H. Hicks has returned from the Maria Parham hospital where she underwent an operation for appendicitis recently.

Friends of Miss Grace Vaughan will be glad to learn that she is able to be out again, after an illness of several weeks.

Miss Lucie Hicks was the guest of Miss Lula Adcock last week. Miss Kathleen Edwards spent several days last week as the guest of Miss Lelia Haye at Ridgeway.

Mrs. James W. Hicks announces the approaching marriage of her daughter, Lucie Mary, to James Lee Ridant of Warrenton, N. C. on June 19, 1931 at Boynton, Va.

Mrs. Alex Buchanan who has been ill several weeks is reported to be improving satisfactorily, her many friends will be glad to learn.

A Born Preacher

Rev. Jesse C. Shull, of Virginia, is related closely to 65 ministers, mostly Presbyterians.

Misses Julia Harris, and Frances Fleming spent last week as the guests of Mrs. Bob Parish in Henderson.

Mrs. W. C. Rogers of Epsom spent the week end here as the guest of her daughter, Mrs. M. Hicks.

Misses Sadie Frazier, Grace Vaughan and Frank Thomas (Vaughan) are spending several days at South Boston, Va., as the guests of their aunt.

Miss Olive Hicks of Dabney was the guest of Miss Lucille Vaughan Sunday.

Miss Sadie Pace Wins Medal

In a recent county contest sponsored by the James Post of the American Legion of Franklin county in which they offered for the best Essay written, a medal. The medal was presented to Miss Sadie Pace who was declared the winner. The Post also gave a beautiful Loving Cup to the Epsom High School, this to remain the property of the school for one year.

EXPERTS TO DESCRIBE WHAT IS GOING ON IN THE WORLD

New York.—Do you know that a miniature wireless robot operating in a free balloon a mile or so in the sky is one of the newest devices employed to give you your weather information?

Or that there are remote island universes of stars incredible distances away which seems to be rushing into space at apparent velocities of 12,000 miles a second?

Or that meteors usually are cold when they hit the ground and that stories of fires started by meteorites are like the one time report of Mark Twain's death, "greatly exaggerated?"

Or that metals sometimes contract under heat and expand when cold as shown by X-rays?

Or that lightweight concrete, aluminum building beams, glass walls and composition furniture are here or on the way?

In answering these and other questions, The Associated Press plans to present a series of stories on "What's Going on in the World Today," the latest developments and future prospects in many lines of scientific and aesthetic endeavor. These stories will be told by experts in their fields.

Scientists are continually at work trying to learn more about the mechanics of life, says Dr. Reginald G. Harris, director of the biological laboratory at Cold Spring Harbor, New York. E. A. Horton, professor of anthropology at Harvard, relates recent discoveries that carry man's cultural history further and further back into the misty past.

H. L. Menchen, well-known critic and editor, has something to say about the possibilities of a better type of literature appearing as a result of the de-

pression, in a review of the current literary scene in America. Harvey Wiley Corbett, chairman of the architectural commission of the 1933 Chicago World's Fair, will tell of America's present day attitude toward buildings as functional structures to be used as long as they serve and to be scrapped the moment they are out of date.

Police officers go to school at Northwestern University to learn about forensic ballistics—the science or art of bullet and firearm identification. Lieut. Co. Calvin Goddard, who was called in on the St. Valentine Day massacre in Chicago, will describe this new and little known science.

Prof. C. V. P. Young, of Cornell University, punctures some popular beliefs concerning ventilation, while William Braid White, an expert in acoustics will tell what the sound engineer is doing to increase pleasant noises and decrease unpleasant ones. Other stories will touch on the latest radiology, sports, surgery, medicine, entertainment, physics, radio, aviation, seismology, art, astronomy, education, paleontology, criminology, geology, music, government, industry and other subjects.

This is the first time that many scientists have written popular reviews of their work for newspaper distribution.

About 10,000 tons of snuff are annually consumed in the United States.

—Warsaw—Three fellows who rolled a barrel of herring 250 miles from Gdynia to Marshal Pilsudski's doorstep have been rewarded. They did it to show they were husky enough to work

The marshal has promised to get them jobs. —The first adhesive postage stamps used by the United States Government were authorized in 1847.
