

SAFETY Director L. B. McAbee, above right, fits the breathing mask of the Pneolator over J. B. Mitchell's mouth and nose in a demonstration of the instrument's use for Plant Physician, Dr. W. B. Parks. Dr. Parks, as well as all plant supervisors will be given instruction in the operation of this new device which is used for reviving victims of asphyxia. Mr. Mitchell, who poses as the victim in the picture, is in charge of pump maintenance for the Shop.

New Safety Instrument Now In Use; Provides Oxygen in Cases of Asphyxia

THE LATEST safety appliance for Firestone Textiles is the new Pneolator recently made available for emergency use wherever needed in the plant. The Pneolator is an instrument which automatically performs artificial respiration in cases of accidental asphyxia.

Safety Director L. B. McAbee has instructed most of the plant's supervisors in the use of this instrument, and plans are that all supervisors shall have soon received this instruction. Time being the most urgent factor in overcoming asphyxia (suffocation), it is important that someone in each department, and on each shift, know how to operate the Pneolator.

While administering artificial respiration, the instrument also supplies oxygen. Once in operation it will sound a warning if for any reason the breathing passage of the victim becomes obstructed. An aspirator is provided which can remove ordinary breathing passage obstructions.

The Pneolator, manufactured by the Mine Safety Appliance Company, has been acclaimed by medical authorities as that instrument which most nearly duplicates normal respiration when used on unconscious victims of asphyxia. It is available, according to Mr. McAbee, at all times at the First Aid Room.

Brotherhood Award Continued From Page 1

"This American's business activities related him to all continents—to Asians, Africans, Europeans, North and South Americans. From these peoples of every color, many nations and all the religious cultures, Mr. Firestone discovered that the larger and wiser direction of man's human relations is of paramount importance to man's economic and physical well-being.

"Mr. Firestone's recognition of the Moral Law—the Divine Law—as the pattern for an enduring and dynamic peace has led him inevitably to his work for the

brotherhood of man under the Fatherhood of God.

"For his career as churchman, businessman, statesman, and humanitarian, we are proud to honor Harvey S. Firestone, Jr."

Bowlers Win Turkeys

Winners of turkeys in the bowling tourney recently completed were Mrs. Hazel Johnson, wife of Recreation Director Ralph Johnson, and Mull Ramsey of the Spinning Department.

What Is Your Hobby?

Second Hand Has Stamp Collection Dating From 1926

SECOND Hand Freddie Kessell has a sure fire method of saving. He swaps dollars for United States postage stamps—which never lose value and sometimes increase in value—satisfying in one operation the desire to further an interesting hobby (stamp collecting) and the necessity of saving for a possible future rainy day.

He became interested in philately, the official name of stamp collecting, when in grade school in his native state of Massachusetts. Since that time he has amassed a large collection of unused domestic postage stamps. Most of his stamps are in "plate block" form, the preferred way to buy and keep stamps from the hobby standpoint.

All the Air Mail stamps ever issued in the United States, except six, are to be found in this collection. Moreover he has most regular issue stamps printed in this country since the year 1926.

As for the plate block mentioned above, it is a four stamp sheet on which the plate number appears along the border. Without this number the stamps become a plain block which is of less potential value to a collector.

Mr. Kessell is especially proud of two of his stamps. One, known as the Korpa error, is an issue of 1945 and was intended to honor the country of Korea. Due to a printer's error the word was spelled Korpa on one stamp in each block instead of Korea. Thus the name "Korpa Error". The other highly prized stamp is a fifty-cent issue bearing a picture of the Garf Zeppelin airship. This stamp is now worth \$9.00 in collector's trading circles.

Not content with one hobby, Mr. Kessell has a woodworking shop in the basement of his home where he can be found on many a late afternoon making furniture or bric-a-brac for his home. In addition he likes to work with plastics, and has successfully mounted Firestone pins in plastic mountings called lavalieres.

Smash Hand Wins Grand Prize In Football Contest

THE grand prize winner in the Football Bowl Contest is Mrs. Jane Rice, a smash hand in the Weaving Department. She correctly picked the winner of each big New Year's Day bowl game, and missed picking the correct total scores of all games by only 2 points. Thus she copped the grand prize of \$15.

Of the 676 participants a total of 14 employees picked all the winners as did Mrs. Rice, however, none were able to match her skill in predicting scores. Twister Tender Hoyt Hardy came nearest to matching Mrs. Rice's card by missing the correct scores in all bowl games by 12 points. He received the second prize of \$10. Second Hand A. C. Kessell missed the scores by 16 points to receive third prize of \$5.

Those receiving honorable mention were: Miss Leona Dameron, Laboratory; W. P. Stephens, Carding; Mrs. Delsie Merritt, Spooling; Roland Jolly, Spinning; Bill Tate, Recreation; B. T. Hanna, Twisting; Miss Sue Van Dyke, Superintendent's Office; Earl Beeker, Laboratory; Mrs. Minnie Kilby, Personnel; John Smith, Laboratory; and Marshall Walker, Twisting.

Angler's Valet of Firestone Velon Is Light, Strong, and Waterproof

LATEST AID to fishermen is a lightweight, waterproof tackle belt called Angler's Valet. The Valet consists of a carrier made of Firestone Velon which fits securely on a man's belt and which is snugly fitted with nine watertight plastic vials and a watertight cigarette and match container. Lures of all types, hooks, sinkers, and even a fishing license may be carried in the various sized shatter-proof containers.

The Angler's Valet is more practical than lure vests or tackle jackets as it needs no laundering and never gets wet from accidental falls or splashes. Its lightness in weight (less than 10 ounces) means greater comfort in warm weather. It is more convenient than a tackle box as it is much easier to carry, is more compact, and provides on-the-spot availability of everything that is needed.

The Valet may also be worn chest high for deep water wading, as rustproof prongs and an accompanying length of elastic permit snug fit above the belt.

The Firestone Velon of which the Valet is made is a sturdy quality in translucent red or blue. It is light in weight, waterproof, and

STURDY Firestone Velon has found a new use in the Angler's Valet, as it's called, shown above.

will not chip or peel in use. The carrying case with draw-string closure, which protects the Valet in storage, is also made of Velon.

The Angler's Valet is a product of Riverside Manufacturing Co., Woodstock, Va., and is priced at \$5.95. It is available at Abercrombie & Fitch in New York and at leading sporting goods stores throughout the country.

SCHEDULES

SECOND SHIFT BILLIARD

Fri., Jan. 9, Twisting-Spinning
Mon., Jan. 12, Weaving-Spinning
Fri., Jan. 16, Carding-Twisting
Mon., Jan. 19, Carding-Spinning

GIRLS' BOWLING LEAGUE

Tues., Jan. 6, Weaving-Twisting vs Spooling
Thurs., Jan. 8, Main Office vs Spinning-General
Tues., Jan. 13, Weaving-Twisting vs Main Office
Thurs., Jan. 15, Spinning-General vs Spooling
Tues., Jan. 20, Main Office vs Spooling

FIRST SHIFT BILLIARD

Tues., Jan. 6, Spinning vs Weaving-Shop
Mon., Jan. 12, Spinning vs General
Tues., Jan. 13, Twisting vs Weaving-Shop
Mon., Jan. 19, Twisting vs Spinning
Tues., Jan. 20, Weaving-Shop vs General

FIRST SHIFT DUCK PINS

Wed., Jan. 7, Twisting vs Carding

Mon., Jan. 12, Twisting vs Weaving
Wed., Jan. 14, Spinning vs Carding
Mon., Jan. 19, Weaving-Shop vs General

SECOND SHIFT DUCK PINS

Thurs., Jan. 8, Weaving-Carding
Tues., Jan. 13, Spinning-Carding
Thursday, January 15, Weaving-Twisting
Tues., Jan. 20, Carding-Twisting
LADIES' PIONEER BOWLING LEAGUE
Wed., Jan. 14, Firestone vs Thread Rockets

6:30 P. M.

AMERICAN BOWLING LEAGUE

Thurs., Jan. 15, Firestone vs Webster Television
8:00 P. M.

SECOND SHIFT SHUFFLEBOARD

Tues., Jan. 13, Spinning vs Carding
Thurs., Jan. 15, Twisting vs Weaving

1:30 P. M.
