Explorer Scout Builds Rockets

Plans To Launch 11-Foot Missile

A Winston-Salem Explorer Scout has a proud mother these days, and rightly so. The scout is Larry Bennett who, with help from the Navy, expects to be firing soon an eleven-foot rocket he and three high school pals designed and built.

The mother is Zephya (Mrs. Paul A.) Bennett of Piedmont's accounting department. She and Mr. Bennett have encouraged Larry in his "shooting for the stars" endeavors for the past four years.

Interest Began

Larry's general interest in rockets goes back several years, but it was in 1955 that he decided to explore the field as downhill."

Two years ago Larry was joined by three other explorer scouts in the rocket work. They are Phillip Mayrand, Vincent Young and LaVern Wright.

Larry says the real progress of the group has been in the development of a special fuel. That and a guidance system similar to the one used in the Army's NIKE missile (though invented without any help from the rocket's manufacturer) have made Larry's accomplishments of interest to the Armed Forces.

Latest Design

The latest design, measuring eleven feet, was developed by the group with Larry in charge of the electronics and nose-cone work, Vincent and Larry in the body design division and Phillip and LaVern in the fuel divi-

Estimated altitude of this "monster missile" is between ten and fifteen miles. The size and scope make it impossible to fire on the present firing grounds built by the boys.

When the scouts go with the Navy to fire the latest rocket of their design, they plan to carry four copies of the model. "With four rockets," said Larry, "we can be assured of successful

Larry, who is a junior at Reynolds High School, hopes to stay with rocket work and make it a career. He said he had found out one important thing in his work so far: that an individual cannot do it alone.

One of the real problems, according to Larry, has been money. Including the guidance sys-

thoroughly as he could. Since GENIUS AT WORK Larry Bennett shows that building rockets then he says his interest has takes many hours of research and planning. His "space laboratory" is been "like a snowball rolling located in the Bennett basement in Winston-Salem,

tem, each of the larger rockets costs about \$400 to fire. The rocket group has relied upon contributions to continue working. But, of course, their ingenuity has turned some commonplace items into rocket parts.

Has Silver Award

Larry is an Eagle Scout and has received the Silver Award for meritorious achievement in scouting. "Thanks to Piedmont, he added. While working on the award, he received instruction in radio, sheet metal construction and overhaul from Piedmont employees.

N. C. State College is now first on his list for college work. He says he doesn't have any favorite subjects in school, but "likes them all." And as for other interests besides rockets, he names "girls."

> BLOCK TO BLOCK . . . (Continued from Page Two)

George Hicks (DCA) has bought a J-3 Cub and is flying night and day (so we understand) to get off his commercial and instrument ratings.

Jim Connor (DCA, also) is interested in doing the same thing and is looking for a small airplane. Anyone who has a good one for sale might give him a

Yours Truly attended the Airlines Customer Relations Conference at beautiful Idaho Springs near Denver. Had a good business session with the industry representatives and enjoyed riding Continental's Golden Jet from Chicago out and back.

Till next month, then.

Congrats

Fare Attends Mail Rate Meet For Local Service Carriers

Milton F. Fare, Piedmont Airlines secretary and assistant would establish final prospectreasurer, attended a meeting of local service airlines in Wash- ates on a temporary rate estabington August 19 and 20.

Mr. Fare and representatives of the twelve other local service carriers met to consider a revised class mail rate plan proposed by the mail rates staff of the Civil Aeronautics Board.

The CAB requested each local carrier to comment on the proposed revision. Piedmont's comments have been submitted. The company endorses the class rate principle.

A class rate for local carriers tive rates. Piedmont now operlished in January, 1959.

James Durfee, chairman of the CAB, who recently spoke on the David Morrison, EWN, Oct. 20 proposal, said, "Our objectives would introduce many incentives, give government better control over subsidies and take the CAB out of the business of second-guessing management.

"Until we have a more rational scheme there will be no financial stability in the local Harry K. Swann, ORF-FB. Oct. transport industry."
